

"GET THE VOTE OUT" URGE SPEAKERS AT BIG HOOVER- EMMERSON RALLY AT MOKENA

The political campaign in rural Will County was opened last Friday night when the first Hoover-Emmerson rally of the fall campaign was held under the auspices of the Mokena Emmerson Republican Club in the St. John Evangelical church parlors in Mokena.

Rev. Clyde R. Wheelang of Evanston, a speaker for the National Republican Committee of Chicago was the first speaker on the program. His subject was "Let us save America for her fundamental American principles" in which he stressed the point that our forefathers thru toil and sacrifice established our nation on principles that have endured and that it is up to the citizens of the Republic to perpetuate these principles if America is to remain on the high plane set by its founders. He showed that the citizens must be so firmly rooted in these principles that they will not be torn loose from their moorings like water lilies are during a storm on a lake. The features brought home were that we must perpetuate the soundness of the principles that have made America great. He lauded Herbert Hoover as the man most immediately fitted to carry on our high ideals of government. He referred to Hoover, not as a politician, but as a creator of wealth, and the politician as a spender of wealth. Rev. Mr. Wheelang made a profound impression with his vivid word pictures and salient truths.

Mrs. Mary Hight, a prominent Chicago woman, also, connected with the National Republican Committee speakers bureau, spoke to the women voters on "The Power of the Woman".

She showed how powerful the women's vote can be if they unite their ballots and by so doing they can vote thru to success any measure or official they choose. "Get the vote out and be sure to cast your vote on election day" was her chief admonition to the women. She showed how utterly important it is that every woman of voting age go to the polls and cast her vote for the Republican ticket on November 6th next. She pointed out that the big cities are working hard for Smith and the entire Democratic ticket and that if Hoover and the Republican ticket is elected it will be due to the voters of Main Street, the small rural communities and towns.

She hit Smith's immigration plans, saying that restrictive immigration laws are the only safe policy. In addition she declared that even the one could purchase a pair of shoes for \$3 under the Democratic regime and there was no employment, it would not help any one.

Henry Lighthall, prominent attorney of Chicago, was the next speaker. He is connected with the Illinois State Central Committee speakers bureau in Chicago and devoted his address chiefly to the merits of Louis L. Emmerson for governor. He urged every Republican voter to support Emmerson for governor and the entire Republican state ticket.

In opening his address he said that Mokena was not shown on the road map he had and he became so incensed that he tore the map to pieces and stamped on it. He declared that he was going to call the attention of the state officials to this omission and that he hoped the Mokena people would back him up.

He further urged the voters to refrain from mud slinging tactics. He spoke of the fine record back of Emmerson which he stated was one that the Republicans can be proud of and on that ground should give their full support to him.

A big ovation was accorded Mrs. Lottie Holman O'Neil, representative of this district who is up for reelection. Mrs. O'Neil made it emphatic that she attends all meetings and rallies where the voters invite her and are anxious to have her present. Mrs. O'Neil made a special appeal to the women voters to vote.

She pointed to her record in Springfield for the past three terms as one that merits her return for the fourth term. Mrs. O'Neil also urged that watchers be placed at every poll, not that all election officials should be viewed with suspicion, but that many of the judges and clerks are not wholly familiar with the election laws and some might be inclined to be unfair. She referred to a certain instance in Downers Grove that occurred two years ago where one of the election officials refused to give Mrs. O'Neil the three votes she was entitled to when a cross was only placed in front of her name, saying this was unfair in his estimation and that he was counting only one vote for each of the candidates for representative. This was contrary to the election law. Mrs. O'Neil was assured a hearty support in Mokena.

Attorney A. H. Krusemark of Frankfort spoke for Hoover and Emmerson. He stirred up a keen interest when he mentioned the county bond issue recently approved by the Will County Board of Supervisors for \$1,750,000 for the purpose of constructing concrete roads in Will County. Mr. Krusemark said he was opposed to the bond issue and felt it should be defeated by the voters of Will County at the election on November 6th. He said his reason for being opposed to the bond issue is that the state is realizing millions of dollars from automobile fees each year which can be used for road building purposes and that if next legislature passes a gas tax there will be sufficient revenue with which to build roads without placing a burdensome tax on the people. He showed that if the county bond issue were voted on favorably it would mean that the state would use the money that would otherwise be spent in paying Will County roads in paying roads in southern Illinois, and thus the people of Will County would be paying for their paved highways twice, first by paying their automobile license fees into the state road fund and then secondly by paying a special tax on the same highways. Attorney Krusemark felt that taxes are high enough now without increasing them when it is not necessary. He declared that a large portion of Eastern Will County is opposed to the proposed bond issue.

Everett Maina, son of Mr. and Mrs. Paul Maina of New Lenox, sang a number of songs which were much appreciated. The audience also sang patriotic songs.

The stage was a mass of flowers so that it resembled a big flower garden. Wild flowers as well as garden flowers were used in the beautiful floral decorations. In the background of this floral beauty was the American flag. Pictures of the candidate on the Republican national and state tickets were prominently displayed on the stage and walls of the church parlor.

As a token of esteem from the Mokena Emmerson Republican Club each lady speaker and her companions were presented with beautiful bouquets of flowers. The men speakers were also presented with buttonholes.

The large church parlor was filled with interested voters, many coming from Joliet, Tinley Park, New Lenox, Marley and the surrounding territory.

L. G. Bruder, president of the Mokena Emmerson Republican Club presided as chairman. Republican literature as well as campaign buttons, auto stickers were distributed.

The Mokena Emmerson Republican Club which was organized and incorporated shortly after the spring primaries, is well pleased with the fine attendance and interest shown. The Club may hold one more meeting shortly before election day.

Hoover's Ability Stressed by Heise

Mokena has had two Republican rallies within the past week. The Will County Central Committee sponsored a rally in the St. John church parlors Tuesday night.

The county candidates were present, also Mrs. Lottie Holman O'Neil who is seeking re-election as representative of this district.

Brief remarks were made by Gustave Erickson, chairman of the Will County Republican Central Committee, Paul V. Wunder, candidate for circuit clerk, W. W. Smith, candidate for recorder, H. Rehn, candidate for state's attorney, John Walker, candidate for representative. Mrs. George Arbeiter who is at the head of the women's work in Will County and Mrs. Lottie Holman O'Neil, also spoke.

W. D. Heise, former state's attorney of Will County was the principal speaker of the evening.

Mr. Heise stressed Herbert Hoover's ability as an executive and business man.

"So far for presidents we have chosen lawyers, or generals and while they have done very well, still the vast business enterprises of this great country of ours deserves the services of a business man of exceptional ability, and I believe that Herbert Hoover is the man for the place," said Mr. Heise in part.

In touching on the farmer's problems, Mr. Heise said that a high protective tariff wall as advocated by Mr. Hoover would shut out cheap foreign grain and give the American market to the American farmer.

In referring to Al Smith and his attitude on the farm question, Mr. Heise said Smith is a city man, is not familiar with farm problems and perhaps never will be.

A quartet furnished a part of the musical numbers. A number of concertina selections were also on the program.

O. E. McGovney, Mokena precinct committeeman was chairman of the

Tinley P. T. A. Maps Program

Vacation days are over! School has begun and now is the time for parents and teachers to unite in a fixed determination to give to the children of our community, this year the best that it is possible for us to give them.

An interesting and progressive evening is in view when Dr. Thos. G. Green, lecturer and traveler, will speak. The date will be announced.

The chairman of the Program committee, Mrs. Chas. Nielsen, assisted by Mrs. J. Funk and Mrs. H. Brandt, promises a real good time on Halloween eve at a Hard Time Party with dancing, games and lots of fun for all.

The refreshments will be in charge of Mrs. Francis Rowden, Mrs. Jennie Klepper and Mrs. Anna Nelson.

Bring the family and help us make this a happy evening long to be remembered.

The baseball equipment presented by the Parent-Teachers Association bids fair to bring fame to Tinley by way of home run hitters, star twirlers, and fielders.

The next regular meeting will be held in the school building October 5th and we hope each home in Tinley will participate in making our community a 100 per cent membership.

At each meeting a vote of members present is taken and the room having the largest number of votes is presented with the P. T. A. Banner. The Primary room is the proud possessor of the banner for the month of September. Make your child happy by casting your vote at the next meeting October 5th.

We were glad to welcome Mrs. Amelia Brennan and Mathilda Steinhagen as new members at our last meeting.

Tinley Garden Club Holds Special Meet

A special meeting of the Tinley Park Garden Club was held at the home of Mrs. R. J. Hug, treasurer, Mrs. Wallace B. Combs, vice-president, presided at the meeting in the absence of the president, Mrs. Wm. Funk.

At the close of the meeting Mrs. Hug carried in the surprise of the evening—a night blooming Cereus with one mammoth blossom which filled the room with its fragrant perfume. Club members marvelled at the beauty of the plant and claimed it to be the first of its kind visioned by them.

Mrs. Wallace B. Combs brought three beautiful roses on one stem to Mrs. Hug. Mrs. R. J. Ryan brought a basket of marigolds from her garden and Mrs. Fred Henke sent a passion flower in bloom, so in all the meeting reminded those present of their gorgeous flower show just past.

The Garden Club had their regular meeting at Mrs. J. C. Funk's last Wednesday afternoon. Mrs. Swisher presented another interesting botany lesson.

Everyone enjoyed the delicious luncheon. The Club will meet again on October 19th at 7:30 in the evening at the home of the president, Mrs. Wm. Funk.

Plan Religious Education Meeting

Tentative plans for the 1928 convention of the Will County Council of Religious Education were recently completed at an executive session of the organization held in the First Presbyterian Church in Joliet. This year's convention will be held in Joliet—a one day session on Sunday, October 21st. The program will include four major topics "Sunday School Standards", "Children's Division Work", "Adult Class Work" and the "Christian Quest Program" for young people and their leaders.

Mrs. Mary F. Bryner of Peoria will be the principal speaker. The executive committee at its last meeting also divided the county into districts each of which will be organized to strengthen the work of the county organization. The districts by townships are as follows: district one, Wheatland, Du Page; district two, Plainfield, Lockport, Homer; district three, Joliet, Troy; district four, New Lenox, Frankfort, Green Garden; district five, Jackson, Florence, Channahon; district six, Wilmington, Reed, Wesley, Custer; district seven, Manhattan, Wilton, Peotone; district eight, Monee, Crete, Will, Washington. Districts one and five are now organized and hold an annual convention.

evening. He announced that a tea will be held at the Caroline Braun home in Mokena on Oct. 3rd and will be in charge of Mrs. Albert Braun, local precinct committee woman. All the ladies are invited.

The Weather

September 29 and 30 unsettled; October 1st and 2nd stormy; 3rd to 6 mild period.

EDW. SCHMAEDEKE, Auctioneer.
Oct. 6—Fred Hank estate, Orland.
Oct. 13—Sam Powers, Oak Forest.

E. C. LUMSDEN KILLED BY TRAIN

The many friends of Rev. E. C. Lumsden, district superintendent of the Methodist Church of the Joliet-Dixon District were horrified to learn of his tragic death Monday evening when an automobile in which he was riding was struck by a Burlington passenger train at a crossing at Hinckley in DeKalb Co.

The Rev. Dr. Lumsden had been a member of the Rock River Conference since 1904. For many years he was pastor of the Gary Memorial church in Wheaton. He was educated in the Northwestern University, and the Garrett Biblical Institute. He was on his way to a meeting at which plans were to be made for the Rock River Conference next week, when the accident occurred.

Surviving him are his widow and son Newell. Funeral services were held in Dixon, Thursday afternoon.

Dr. Lumsden often was heard in the M. E. Churches at New Lenox, Mokena, Tinley Park and Frankfort. His last public appearance in this section was at the dedication exercises of the Boy Scout Cabin at New Lenox a month ago.

Democrats Whoop Things up at Peoria

A. J. Cernak and a detachment of the headliners of the Illinois Democratic party went to Peoria, Illinois on Thursday, September 27 to whoop things up for Al Smith and the entire Democratic slate. They will be the guests of the Peoria Tammany Club at a dinner to be held at 6:30 p. m. in the Jefferson Hotel.

In the group were the following: A. J. Cernak, candidate for U. S. Senator, Charles F. Brown, candidate for Congress at large, Thomas Courtney, candidate for Attorney General, George Alschuler, candidate for State Treasurer, President Cernak of the County Board will talk on the issues of the national campaign, including the issue closest to the city of Peoria, which took away the greatest prosperity of that city and forced the farmers of Illinois to pay high taxes, while their market was taken from them.

Thomas Courtney will tell the people of Peoria, why Oscar Carlstrom, linked as he was with the past state administration, should be repudiated.

Route 51 Opened

Route 51 is open for traffic from 143rd street east of Orland Park south to the Mokena road. A force of men and teams are engaged now in building earth shoulders along this road.

The Frankfort end of this road is still closed. Traffic is going thru Mokena down the Wolf road to the Lincoln Highway.

Paving of the Wolf road from 143rd street in Orland township to the Will-Cook County line is finished. Paving of 143rd street west of Orland Park to the County line is also finished. Wolf road will be open to traffic within a week or 10 days.

Will Debate Wet And Dry at Mokena

Brotherhood meeting, Thursday, October 4th at 8 p. m. After the regular session, Brotherhood members will debate the 18th amendment. Resolved, "That Prohibition is a success!"

Those who are debating the affirmative side of the question are: Mr. Leon Tonn, I. D. Marti and Mr. Kenneth Eddy. Those who are debating the negative side are: Mr. Harvey Reab, Mr. Roland Kreimeier and Rev. W. J. Cramer. After the debate a delicious luncheon will be served by fourteen members of the brotherhood. All members are asked to come to this meeting. If you have a friend interested in our brotherhood, bring him.

Pork shanks, saur kraut and rye bread will be served.

Strassenburg Farm Sold at Auction

The Ferdinand Strassenburg farm of 140 acres in Frankfort township was sold at public auction last Saturday afternoon to settle the estate. Quite a number of bidders were present and bidding was quite keen. The following were the successful bidders, the acreage they bought and the prices paid:

One tract of 40 acres sold at \$160 per acre and was sold to Ona E. McGovney, Mokena real estate agent.

A tract of 60 acres was sold to Adam Horn of Orland township for \$152.50 per acre.

The third tract of 40 acres was sold for \$115 per acre to Edward Strassenburg of Orland township.

Edw. Schmaedeke was the auctioneer.

AUCTION SALES

EDW. SCHMAEDEKE, Auctioneer.
Oct. 6—Fred Hank estate, Orland.
Oct. 13—Sam Powers, Oak Forest.

Lions to Re-organize At Orland Park

Rumblings and growls from the den of the Orland Park Lions Club announce that there will be something doing soon. The Orland Park Lions club which started out so auspiciously had fallen into a state of lethargy due to a combination of unfortunate events. August Schmaedeke first President of the club was obliged to leave Orland Park shortly after his election because of business matters.

After a period without a head, Gordon Powell was selected to lead the organization and now Mr. Powell has moved to Joliet to enter business there and the Lions are again without a leader. At a meeting held Monday evening in the parlors of Orland Methodist church called by Jack Schmaedeke and Rev. Paul Sanders, a number of the members assembled to discuss plans for the future. It was unanimously decided that there was a fruitful field for such an organization as the Lions club in the Orland community that the organization should continue to function with renewed enthusiasm and increased vigor. A meeting will be called shortly, probably the early part of October at which new officers will be elected and definite plans of organization and action will be decided on.

All public spirited citizens of the community who are interested in "doing" instead of merely suggesting and criticizing are urged to get in touch with the secretary, Rev. Paul Sanders and get into the band wagon when it starts out on its trip to progress.

Tinley Lions to Put On Harvest Festival

The next big event in Tinley Park will be the big "Harvest-Halloween" dance festival which is being sponsored by the Tinley Park Lions Club and which will be held in the Saenger Hall, October 27. Cash prizes will be given as follows: \$5 for largest ear of corn, \$5 for heaviest pumpkin, \$5 for best Halloween pumpkin lantern.

Music will be furnished by Frank Glasgow and his rhythm kings. Everyone is invited to join in the fun and good time.

20 New Homes Built at New Lenox

New Lenox has enjoyed a big building boom all summer, 20 new houses being constructed, of which 14 are still under construction. The past three years 56 new buildings have been erected. Most of the building activity is in Brookwood Park and the McIntosh subdivision adjoining on the north.

The New Lenox Lions Club are also quite active. They are building a stone road from the Lincoln Highway to the Boy Scout Cabin. The new road will cost about \$150.00.

Football Next

The football season opens Sunday afternoon in Tinley Park when the New Lenox football team plays the Tinley Park team.

Admission will be "two bits". A good attendance is looked for.

Many Attend Maue Rites

A very large number of friends, relatives and neighbors attended the last rites for E. J. Maue at the St. John Evangelical church in Mokena last Thursday afternoon. Rev. W. J. Cramer preached a masterful sermon in which he likened our lives to a fine tapestry into which a beautiful design is woven. He said our lives tapestry is woven on the loom of time and when death comes the Master weaver takes the finished tapestry from the loom. Rev. Mr. Cramer has been receiving compliments on his fine word pictures.

Aviation Progress

The giant steps forward which aviation has taken in the last two years is one of the "wonders of the world." Especially is this true in the United States where the airplane has become a factor in our economic and social life which affects every one of us.

In this issue of The News-Bulletin there is an illustrated feature article which tells of this development, especially the changes which have been brought about by the increased use of the air mail. Be sure to read "America Takes to the Air," by Elmo Scott Watson in this issue.

Makes Survey Of Wolf Road

L. G. Bruder, chairman of the Mokena Improvement Association is in receipt of the following letter from the Chicago Motor club regarding a survey of Wolf Road: L. G. Bruder, Chairman, Mokena Development and Hard Road Improvement Assn., Old Colony Building, Chicago, Illinois.

Dear Sir: Recently I made the long promised survey of Wolf Road for a distance of six miles south of the Cook County line.

I shall be glad to come in and talk with you concerning this gap at your convenience, or if you desire to call at our office in about two weeks time we can take the matter up then. I shall be out of the city during the next two weeks.

Yours very truly,
CHICAGO MOTOR CLUB

C. A. Snyder
Highway Improvement Manager.

Killing Frosts

The coldest autumn weather in the memory of the oldest residents visited this section this week. Killing frosts Sunday, Monday and Tuesday nights killed all garden truck and flowers. Corn was far enough advanced so it was not damaged. Many flower lovers covered their plants with paper and old clothes and saved them from Jack Frost.

First Snow

The first snow flurry of this season was seen Tuesday morning when a few big flakes were seen mingled with the rain which fell for a few minutes. This was the first snow in September in many years. Some of our weather wise acres predict an early winter.

GARAGES, BARNs, FENCES, CRIBS, ETC. A VISIT TO US WILL

The state court of claims will no longer act as a charity body for those who, on one pretext or another, hope to get damages from the state.

At a recent meeting held in the capital city, the court ruled that the "equity and good conscience" provision of the statute does not permit the court to allow charitable claims against the state, but the court can allow only such claims as are based on a statute of facts that would prove and warrant a recovery against the state if it were a private party.

Lawyers state that this rule will reduce the litigation in the court by at least one-third, and will, in its effect, save the state many thousands of dollars.

An extensive plant propagation program, under way as a branch of service administered by the plant industry division of the Illinois department of agriculture, is evolving self-resistant strains of watermelons that will grow successfully in various sections of the state of Illinois. The Conqueror—a variety of melon that will resist rust but possesses scarcely any other virtues that would recommend it—has been crossed repeatedly with the kinds the markets prefer. The advantages of fine flavor, desirable size, shape and texture are being retained and with them the ability to resist blight are added by the influence of the hardy Conqueror.

C. F. Mansfield, Jr., secretary of the Illinois Conservation and Flood Control association, says that when the twenty million dollar bond issue becomes a law by the favorable vote of the people an average of 2,500 acres of forests, game and fish preserves and public shooting, fishing and recreation grounds will be available in every county in the state where suitable lands can be found.

Lands will be reforested, stocked with game and song birds; streams and artificial lakes will be bountifully supplied with native fish.

Men, women, boys and girls returning to their homes and work after visits to these state-owned playgrounds will become better workers and better citizens, and will have been developed physically and morally by their picnics and fishing and camping on these great state-owned playgrounds in every county.

The entire cost of this project will be borne by the sportsmen without one cent of direct taxes. A failure to vote on November 6 will be a vote against this great conservation and recreation program.

The average date for the first killing frost in northern Illinois, as revealed by a study of the records in twenty weather observation stations, going back from 12 to 50 years, is about October 8. The earliest killing frost, officially recorded, is August 30, at Freeport. In central Illinois, the law of averages indicates that killing frosts may be expected in mid-October. In the southern end of Illinois, fifteen government weather observation records show that the average date for the first killing frost has been October 23. Exceptionally early dates for killing frosts are listed in the southern Illinois territory as follows: September 14 at Sparta; September 15 at Flora and Mt. Vernon, and September 18 at Olney. These records run back for nearly a quarter of a century. The crop and live-stock statistics, issued by the Illinois and United States Departments of Agriculture, give this information from the weather bureau records in Circular No. 374, now available upon application.

Back in the days when the "depot clock" in Springfield was standard time for railroads, the railroad speed limit was five miles an hour through Springfield and Decatur and six miles an hour through Illinois cities.

This and other curiosities of early railroad history in Illinois difficulties and successes of railroad establishment and operation, and accounts of developments of all lines which have a part in Illinois history, are contained in a volume entitled "One Hundred Years of American Railroad," just completed by John Starr, Jr., author of "Lincoln and the railroads."

From a very modest start, Illinois railroading has increased until today it is one of the state's greatest industries, adding its quota to the American railroad properties of which Starr says there are twenty-six billion dollars' worth, 420,000 miles of track, 70,000 locomotives, 60,000 passenger cars and two and a half million freight cars in service.

Whether or not the coming session of the state legislature will be asked to pass a tax on gasoline used by motor vehicles is being agitated in all sections of the state. Support is coming from many sources.

Recently the question was up for discussion at the annual meeting of the Illinois Municipal league. That organization went on record as favorable to a state tax of three cents a gallon on gasoline used by motor vehicles, with an equal division of the tax collected among the state, counties and cities for the upkeep of the roads.

Within a few months the fifth bridge to be constructed across the Mississippi river, connecting Missouri and Illinois will be completed and opened for traffic. All of the five structures have been projected within the last two years, and result from the development of the state highway system of Illinois.

Three of the bridges across the Mississippi are now open for traffic. The structures at Alton, Louisiana, Mo., and Cape Girardeau, Mo., are now being crossed by thousands of vehicles daily. Two additional bridges, at Cairo and Mitchell, are nearing completion and will be open for traffic before the first of the new year.

Previous to the construction of hard roads across Illinois, touching the Mississippi river, there was no bridge across that river between St. Louis, Mo., and Memphis, Tenn., devoted to vehicular traffic and it was necessary to depend entirely on ferries.

Contracts for approximately one million dollars in roads and bridges have been awarded by the state division of highways. The work extends to all parts of the state. The awards are as follows:

Section 94A, section 116C, Henderson county, bridge; to C. D. Stratton, Little York, \$4,737.48.

Route 94A, section 116B, Henderson county, bridge; to C. D. Stratton, Little York, \$4,262.90.

Route 94A, section 116, Henderson county, pavement; to M. Hayes & Sons, Chicago, \$89,391.50.

Route 63, section 631, Cook and Kane counties, pavement; to Charles E. Kiertz & Son, Elgin, \$133,064.60.

Route 72, section 120, Ogle county, pavement; to Duncan Construction company, LaSalle, \$140,028.40.

Route 1, section 50, Edgar county, pavement; to Alan J. Parrish, Paris, \$4,884.90.

Route 2, section 77X, Winnebago county, pavement; to Star Construction company, Rockford, \$1,404.16.

Route 146, section 111E, Johnson county, bridge; to W. H. Shons company, Freeport, \$3,245.96.

Route 1, section RC, Vermillion county, bridge; to Zimmerly Bridge company, Paris, \$1,769.25.

Route 54, section 541, Cook county, pavement; to Broadway Construction company, Chicago, \$337,481.28.

Route 78, section 134, Fulton county, pavement; to Hartmann-Clark Bros., Peoria, \$48,133.36.

Route 80, section 104, Carroll and Jo Davies counties, pavement; to Anderson & Empe, Marshalltown, Iowa, \$240,158.24.

Route 95, section 114, Hancock county, pavement; to J. L. Wells company, Rock Island, \$45,997.79.

What a summer residence and office of the President of the United States can do for a town and district is illustrated by the metamorphosis of Rapid City, S. D. President Coolidge's summer in and near that city last year has given the place a stimulus that apparently nothing else could have done.

The attention of the entire United States was attracted to the town which has followed a line of improvements with tourists and settlers that has worked an almost magical transformation. Last summer was the first time that a president of the United States ever established a summer residence and headquarters west of the Allegheny mountains and the novelty probably directed the attention of the people more to Rapid City than if Presidents had for years been coming west for their vacations.

While the town was well established before President Coolidge honored it with his summer sojourn, it has jumped by leaps and bounds in every way since that eventful summer. The population of Rapid City has increased in one year from 7,000 to 10,000, the city has been almost entirely repaved, a million dollar hotel has been erected, the city has just voted a bond issue to construct a large auditorium, a new hospital has been finished, hundreds of new homes have been built, a score of industries have moved to the district, thousands of people have and still use Rapid City as a starting point for touring the scenic Black Hills, which President Coolidge "discovered," and new life abounds in every direction.

For the detection and eradication of the common barberry, a survey of farms in Illinois is under way as a joint activity of the United States Department of Agriculture and the division of plant industry, Illinois department of agriculture. The common barberry is condemned as a menace to successful wheat production and as a cause of blackstem rust.

Bids for the construction of several stretches of hard roads in various parts of the state will be received in the capital city by the state department of public works and buildings on Wednesday, October 3. In addition to the roads, bids will also be received for grading and bridge sections.

The European cornborer has not reached the fields of Illinois. O. T. Olsen, superintendent of the division of plant industry, Illinois department of agriculture, states.

The united state and federal forces have thoroughly inspected cornfields with an aggregate area of some 23,000 acres, Olsen finds. The entire border has been scouted from Lake county down the Indiana line as far south as Wabash county. Federal men are carrying on a similar investigation in the southern end of Illinois along the Ohio river.

Lesson for September 30

PAUL THE MISSIONARY

GOLDEN TEXT—Christ liveth in me.—Galatians 2:20.
PRIMARY TOPIC—Stories of Paul.
JUNIOR TOPIC—Paul, the Brave Missionary.

INTERMEDIATE AND SENIOR TOPIC—Paul the Dauntless.
YOUNG PEOPLE AND ADULT TOPIC—"In Labors More Abundant."

In the review of this quarter's lessons, a good opportunity is given for character study. The interests of the quarter's lessons center in Paul, Stephen, Barnabas, John Mark, Luke, Timothy, James and Ananias. Assignments should be made a week in advance for the preparation of brief essays by the pupils.

Another method would be to lift out the principles contained in the lessons of the quarter and apply them to the important problems of the day. The following suggestions are offered:

Paul's Ideal Education; Evindicences of Genuine Conversion; What Is a True Christian? What Is the Real Missionary Spirit? Who Should Go as Missionaries? Should Religious Differences Be Compromised? If so, How Far? How to Be Assured of Divine Leading.

Perhaps the most satisfactory method for adults is to summarize the facts and state the leading lessons. The following suggestions are offered:

Lesson for July 1. Paul, by birth and education, had much to be proud of. A godly ancestry and a true education ought to be the heritage of every child.

Lesson for July 8. While Stephen ministered in the benevolences of the church he testified of Christ and met with violent opposition. The ring-leader in this opposition was Paul. A man may be conscientious and wrong.

Lesson for July 15. Paul in unbelief zealously persecuted the church, even consenting to the death of Stephen. When his eyes were opened by the appearance of Jesus Christ on the road to Damascus he was transformed into a zealous witness for Christ.

Lesson for July 22. The sight which Paul had of Christ was so real that he at once testified of His deity and saving power.

Lesson for July 29. Paul and Barnabas were sent forth by the Holy Ghost to preach the gospel to the Gentiles. They were opposed by Elymas, the sorcerer. Spirit-filled men will most surely meet with opposition.

Lesson for August 5. The preaching of Barnabas and Saul was accompanied with such wonderful signs that the people attempted to worship them as gods. The same people soon moved to stone them. Despite this horrible treatment, Barnabas and Saul carried on their work.

Lesson for August 12. The question of the grounds upon which Gentiles were to be received was bitterly debated. Paul preached that it was to be by faith alone. Certain Judaizing teachers taught that faith was to be supplemented by the works of the law.

Lesson for August 19. Paul was forbidden to preach in Asia; then called to preach in Europe. Divine guidance is just as really shown in closed doors as in open doors.

Lesson for August 26. When Paul's missionary work interfered with the unlawful gain of certain men at Philippi, he and Silas were sent to jail. Through their miraculous deliverance and their testimony of the saving power of Christ, the jailer was converted.

Lesson for September 2. Wicked Jews followed Paul to Thessalonica and Berea. They stirred up the people to such an extent that he had to flee. Wherever he went his ministry was accompanied by supernatural signs so as to convince the Gentiles.

Lesson for September 9. Paul preached the gospel in Corinth with such power that many were saved. The gospel is the power of God unto salvation.

Lesson for September 16. The church was threatened with disruption through party spirit. The right conception of the gospel, Christian ministers and persons constituting the church, will cure sectarianism.

Lesson for September 23. The Christian should abstain from that which might cause his brother to stumble.

Love One Another

Let us love one another whilst we live! I would speak for a kind word on behalf of those who are sitting next you and making your own house glad by their deft fingers and their loving hearts.—Joseph Parker.

Serving God

Serving God just where you are, with what you have, and nothing else. God requires nothing more; He will take nothing more. It is yourself, in your own position, wherever you are that He wants.—Margaret Slattery.

Thy Will Be Done

To do or not to do; to have, or not to have, I leave to thee; thy only will be done in me; all my requests are lost in one, "Father, thy will be done!"—Charles Wesley.

THE KITCHEN CABINET

(© 1928, Western Newspaper Union.)

People have to live first before they can see, and they don't think until they are fed, and one needs always to have enough turnips and cabbages to eat without troubling about getting them, in order to see in them anything else except food.—Mrs. Wilkins.

VARIOUS THINGS

Adding the pulp of one-half of a banana to powdered sugar icing makes a most tasty frosting for any cake.

When serving whipped cream cut up a few marshmallows, add to the cream and when well mixed set away on ice for an hour or more. You will have the stiffest and best flavored of cream when serving time comes.

A mayonnaise dressing which is different has added to it a spoonful of apple butter.

When serving roast with boiled onions, did you ever take the onion water to make gravy for the roast? If not try it and add a few letters of vitamin to your meal.

There is a good homemade sundae which will be enjoyed any day in the week: Put a ball of vanilla ice cream on a slice of canned pineapple. Over it pour a sauce made of canned apricots put through a sieve and sweetened. Sprinkle with some chopped salted almonds and serve.

Hot Spiced Tongue.—Boil, skin and trim a good sized beef tongue. Rub into it one-half teaspoonful of ginger and one tablespoonful of allspice. Fry a small onion in butter, dredge the tongue with flour and brown in a hot frying pan. When nicely browned place in a casserole, add one tablespoonful of flour to the fat in the pan, add one cupful of stock, the juice of a lemon and one-half-cupful of seeded raisins. Pour this sauce over the tongue. Bake half an hour and serve.

Milanese Tongue.—Rub a clean beef tongue with salt and pepper and boil until done. Skin. Put a layer of cooked macaroni into a baking dish, add one cupful of strained tomato juice, one tablespoonful of minced onion, one small green pepper chopped. Lay the tongue on this and cover thickly with buttered bread crumbs. Bake until a rich brown.

Date Nut Pudding.—Cream one-third of a cupful of butter, add one cupful of granulated sugar slowly, then add three eggs well beaten, three tablespoonfuls of flour mixed with one-half tablespoonful of baking powder, one cupful of milk and one cupful of walnut meats cut fine. Bake slowly for one hour and serve with whipped cream.

About Bananas.

The banana comes to us in a germ proof package sealed by Nature herself. The thick skin protects the edible portion from bacteria, molds or other contamination. A worm eaten banana is unknown, this fruit is especially free from insect pests.

As a food for children ripe bananas are especially good, because they are nutritious and easily assimilated. The flavor is so delicious that a child will eat them instead of sweets. The fully ripe banana is being used more and more in the dietary of young children.

Among the dietitians who have given careful study to bananas as food for children are Doctor Pease and Doctor Rose of the New York Post-Graduate Medical school and hospital. The following quotation from the American Journal of Diseases of Children, summarizes in part the conclusions of their experiments:

"The banana is a useful fruit that can with profit enter liberally into the child's dietary, provided it is fully ripe or well cooked. If eaten raw, when fully ripe, the banana makes a most delightful and highly nutritious article of food. Its composition does not warrant the use of the banana as the main component of the child's dietary, but it can compete with other fruits, and is decidedly to be preferred to candies."

In the treatment of chronic intestinal digestion (celiac) Doctor Hass of New York has used bananas extensively. This disease is characterized by the inability to utilize properly carbohydrates and fats. In his treatment he has avoided all carbohydrates except those in the extremely ripe banana, and small quantities which occurred in certain milk products which he has used.

When a small cake is desired to serve with punch the following is one which has been recommended:

Hermits.—Cream six tablespoonfuls of butter and two-thirds of a cupful of sugar together, add one beaten egg, two tablespoonfuls of milk and mix well. Sift one and three-fourths cupfuls of flour with two and one-half teaspoonfuls of baking powder one-half teaspoonful each of nutmeg, clove, nutmeg and salt and one teaspoonful of cinnamon. Add to the first mixture and beat well. Add one cupful of chopped raisins and drop by teaspoonfuls on a greased pan bake in a hot oven ten to twelve minutes.

When a small cake is desired to serve with punch the following is one which has been recommended:

Hermits.—Cream six tablespoonfuls of butter and two-thirds of a cupful of sugar together, add one beaten egg, two tablespoonfuls of milk and mix well. Sift one and three-fourths cupfuls of flour with two and one-half teaspoonfuls of baking powder one-half teaspoonful each of nutmeg, clove, nutmeg and salt and one teaspoonful of cinnamon. Add to the first mixture and beat well. Add one cupful of chopped raisins and drop by teaspoonfuls on a greased pan bake in a hot oven ten to twelve minutes.

MONARCH QUALITY FOOD PRODUCTS

set the standard. If you paid a dollar a pound you could not buy better food products than those you find packed under the Monarch label.

Raid, Murdoch & Co. Established 1853 General Offices, Chicago, Ill.

Turkey Takes Census

The population of Turkey, according to figures published by the director of statistics, based on the latest census, is 13,666,275 inhabitants. Of this number 1,044,306 live in Turkey in Europe and 12,615,969 in Turkey in Asia.

A Sour Stomach

In the same time it takes a dose of soda to bring a little temporary relief of gas and sour stomach, Phillips Milk of Magnesia has acidity completely checked, and the digestive organs all tranquilized. Once you have tried this form of relief you will cease to worry about your diet and experience a new freedom in eating.

This pleasant preparation is just as good for children, too. Use it whenever coated tongue or fetid breath signals need of a sweetener. Physicians will tell you that every spoonful of Phillips Milk of Magnesia neutralizes many times its volume in acid. Get the genuine, the name Phillips is important. Imitations do not act the same!

PHILLIPS Milk of Magnesia

Gave Name to Fabric

Batiste is said to get its name from Baptiste, a linen weaver of Cambrai, France, who invented this cloth, a kind of cambric, frequently dyed or printed.

Books are a wonderful help to a man—especially bankbooks and pocket books.

NURSES know, and doctors have declared there's nothing quite like Bayer Aspirin for all sorts of aches and pains, but be sure it is genuine Bayer; that name must be on the package, and on every tablet. Bayer is genuine, and the word genuine—in red—is on every box. You can't go wrong if you will just look at the box:

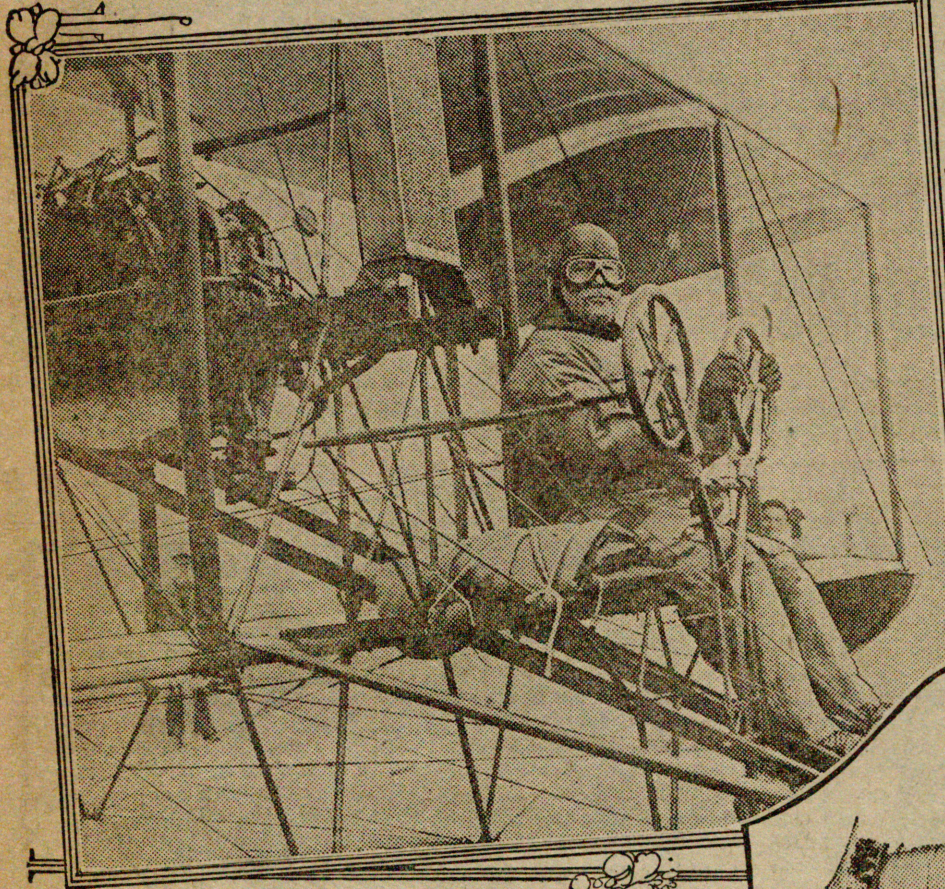

Aspirin is the trade mark of Bayer Manufacture of Monoaceticacidester of Salicylicacid

SWISSCO HAIR TREATMENT Restores Color to Faded Hair. Removes Dandruff. Stops Falling Hair. Makes Hair Grow. One and \$1.20. At druggists or direct, Swissco Hair Treatment Co., Cincinnati, Ohio.

REDUCE Your Surplus Flesh. Excess flabby flesh is productive of ill health and certainly is out of line with modern ideas of

America Takes to the Air

YESTERDAY - P.M.A. PHOTO

By ELMO SCOTT WATSON

DID you exclaim "Old stuff!" when you read the title of this article? Of course, America has taken to the air! Orville and Wilbur Wright were the first to do it and that was 20 years ago. And look at all that's happened since then, especially in the last year or two. I guess the feats of Byrd and Chamberlain and Goebel and Lindbergh (and, of course, Ruth Elder and Amelia Earhart) and a lot of others prove that America has taken to the air, all right!

But do you realize how thoroughly America (and that means ALL of us and not just a few daring flyers) has taken to the air, how intricately the "blue streak" of air travel is woven into the fabric of our national life and how many phases of our daily existence is affected by aviation? And do you realize how rapid are the developments in aviation—not "within the last year" but RIGHT NOW—and how many changing conditions are brought about by the airplane almost overnight? This last is one of the most amazing factors in this subject of America's taking to the air.

Take for instance the matter of "spanning the continent" or "diminishing the space which separates the two coasts of the United States." Do you realize that within seventy-eight years the time for doing that has been cut down from twenty-four days to eighteen hours and fifty-eight minutes? The best way in which to illustrate this astounding fact is to cite the career of a man whose life span of ninety-seven years has seen all of the rapid changes in transportation involved in that reduction take place. He is Ezra Meeker of Oregon Trail fame who claims the distinction of being the only man to cross the United States by ox team, stage coach, train, automobile and airplane.

In 1850 Mr. Meeker could have mailed a letter in New York which after three days by rail and twenty-one days by stage coach would be delivered in San Francisco twenty-four days later. In 1860 another of his letters would go by rail in two and a half days to St. Joseph, where it would be carried by pony express in eight days to California; total time ten and one-half days. In 1876 a letter, traveling by special train would have gone from New York to San Francisco in 100 hours or four days and four hours. If Mr. Meeker should mail his letter in New York today to go by the regular mail routes on extra fare trains it would get to San Francisco in 90 hours, or 3 days and 18 hours. But if he put an airmail stamp on it (as he actually did with a letter when the new five-cent airmail rate went into effect last summer) 31 hours, or one day and 7 hours, after it left New York it would be in the city of the Golden Gate.

Those statistics deal with regularly scheduled methods of transportation. When dealing with what may be termed "special effort" the records are even better and even more illustrative of the statement that conditions change over night. A record in crossing the continent was made a few years ago when A. H. Smith, president of the New York Central railroad died and a special train was provided to take Mrs. Smith from Los Angeles to New York. The trip was made in 69 hours and 11 minutes. In 1923 Lieutenants Kelly and Macready made a nonstop airplane flight from coast to coast in 26 hours and 58 minutes. For five years that record stood. Then one day in August of this year Art Goebel set out from Los Angeles for New York. He arrived in 18 hours and 58 minutes. Yesterday the Atlantic and the Pacific were 26 hours apart. Today they are but 19 hours apart.

And that fact is typical of the RIGHT NOW rapid development of aviation. What is new yesterday is old today and obsolete tomorrow. Between the time this article is being written and the time you are reading it some of the records quoted in it may already have been broken and some of the facts which are new now may truly be "old stuff" then. For the flight of the aviator establishing a record is faster than the workings of the typewriter, the typesetting machine and the newspaper press in putting the story of his feat into print and getting it to all who would read of it.

Nothing is more typical of the rapid advance of aviation, than the development of the air mail service. There was scarcely a day during the past summer that the newspapers did not tell of some new extension of this service. Perhaps the most important announcement and the one which brought home to most people the fact that aviation was a part of their daily life was the inauguration of the new five-cent rate for airmail. But on that same day Postmaster General New issued an advance announcement of another innovation—steamship-airplane mail service which would

save 24 hours between New York and France. Another announcement at about that time was that a 1,260 mile air mail line was to be opened from Key West, Florida, to Porto Rico giving Cuba, Haiti, Santo Domingo and Porto Rico service each way three times a week and that possibly the service would be extended by way of the Leeward and Windward Islands to Port of Spain in Trinidad. Still another announcement at that time was the projected opening of a 1,640 mile route from Key West to the Canal Zone serving Cuba, Mexico, Belize, British Honduras, Republic of Honduras, Nicaragua, Costa Rica and the Canal Zone seven times a week. And less than a year after "Lindy's" nonstop Washington-to-Mexico City flight the air mail was preparing to follow him across the border with an air mail route of 2,800 miles, the longest in North America. And these are only a few among the many of the air mail developments which came to pass last summer which are taking place as this is being written and which will be taking place when these words are read.

One high spot in the series, because it offered an opportunity for a recapitulation of air mail progress, was the announcement that on a certain day air mail planes had flown more than 25,000 miles (or the equivalent of the distance around the earth) over 35 states carrying more than seven tons of mail, exclusive of express and passengers. That statement, as had few others, forcibly demonstrated the fact that the day of dependable air transport had definitely arrived and that it was a more important factor in American social and economic life than most Americans realize.

It served, too, to recall the fact that this record of the mail planes, around which this nation is building its commercial aviation, was achieved after many disappointments and much pioneering. Air transport, as we have it today, began with the effort of the Post Office department to transport mail by airplane between New York and Washington ten years ago. Private capital was not interested and it devolved on the government to prove the feasibility of this form of transport. The post-office expanded the service as funds permitted and late in 1920 the transcontinental route, the longest single airplane route in the world, was established. The mail was flown by day and "trained" by night.

It was apparent that unless night flying was possible, transportation of mail and other commodities by air could not attain maximum benefits. A memorable series of tests of night flying, over unlighted airways, was resorted to. In July, 1924, the transcontinental air mail went on a night and day basis and the time from New York to the Pacific coast was cut to 32 hours. That marked the beginning of the present day era of 24-hours-a-day air mail service.

Private capital began to show interest in taking over the operation of mail routes and in 1925 the postmaster general was given authority to contract with individuals to transport the mail on contract, this to be obtained by competitive bidding on a poundage basis. By September 30, 1927, all of the routes were being operated by private companies. Then began a systematic campaign to acquaint the public with the advantages of air mail and soon the poundage carried began to show substantial increases. New routes had been added and the mileage began to approach the 20,000 mile a day figure. Then came the announcement that the new air mail rate would be five cents for the first ounce and ten cents for each additional

ounce and the public responded to it quickly.

Now, just ten years after the first mail was carried by day over a 218-mile "run" between New York and Washington there are 20 routes traversing 35 states, serving 62,000,000 people directly and millions more indirectly, through an air mail train hookup. The planes which made only two stops ten years ago now drop out of the skies onto 102 landing fields, scattered from the Great Lakes to the gulf and from the Pacific to the Atlantic. Cities which were distant yesterday are neighbors today for air mail has reduced the size of America to the dimensions of Texas, when measured in terms of transportation time.

Over these 20 routes during the first six months of this year a total of 42,000,000 letters were carried and in that time 1,051,767 pounds of air mail reached its destination safely and on time. But it is not alone in terms of letters that the new form of transport is so important in modern American life. Air transport has become a vital factor in American business and social life.

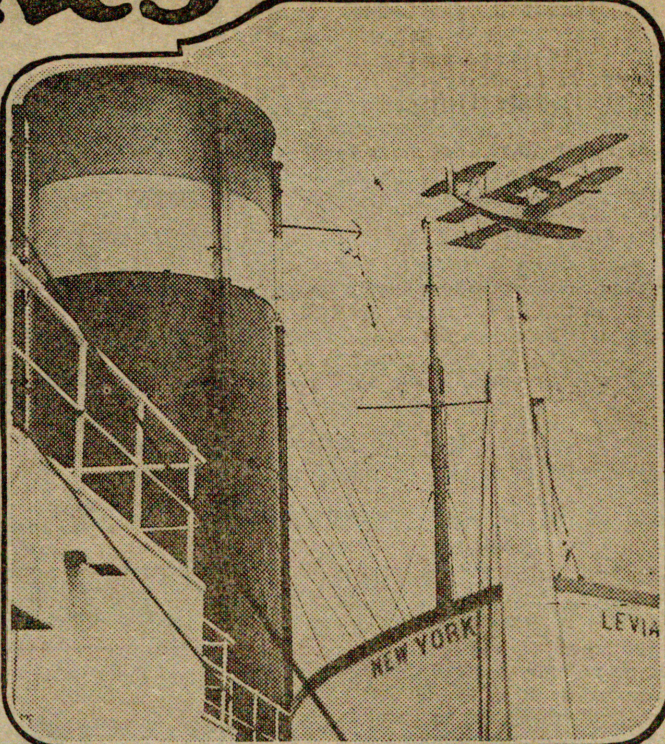

Recent increases in the rate of call money have brought airplane mail into a greater use by banks than ever before. With call money hovering around 6 per cent, and reaching 8 per cent in June, this year the highest since 1921, the banks and financial institutions, especially on the Pacific coast where three days' saving in transit time can be made by using air mail, utilize this form of transportation to save interest. And Midwest bankers as well sent an increased volume of business air mail to save one or two days interest. Each day approximately \$24,000,000 in negotiable paper arrives in Wall Street by airplane from all over the country. It has been estimated that in a year capital arriving in New York by air mail would total \$7,200,000,000, and interest saved by the use of air mail is equivalent to \$144,000,000, when interest is figured at only 2 per cent.

Thousands of dollars monthly are saved by firms who use air mail to forward bills of lading on cargoes like silk, oil, and rubber landed at seaboard points.

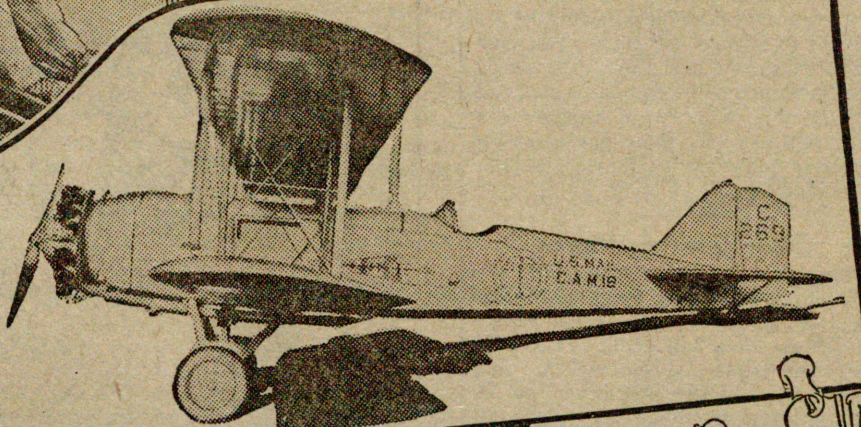

Colorado sweet peas are being shipped daily by air mail and within 24 hours after they are picked they are on sale in middlewestern florist shops. California orchids have found enlarged markets since they could be delivered over the airway network. Sentimentally inclined swains are regular patrons of the airways in rushing flowers and presents to distant sweethearts.

Such instances of how America has "taken to the air" to speed up communication, to transact business and to take every advantage of the facilities which the air mail routes provide could be multiplied indefinitely. And the end is not yet for January 1, 1929, will see more routes start operations, while work on air ports, necessary to secure air mail service, is going on in all parts of the country and the government reports 665 air ports projected in addition to the hundreds now operating. The lighting of airways continues and today there are "land lubber" lighthouses on mountains and prairie to guide the night pilot, the mileage of lighted airways being 7,000 miles and appropriations to light 4,000 more miles have been made for this fiscal year.

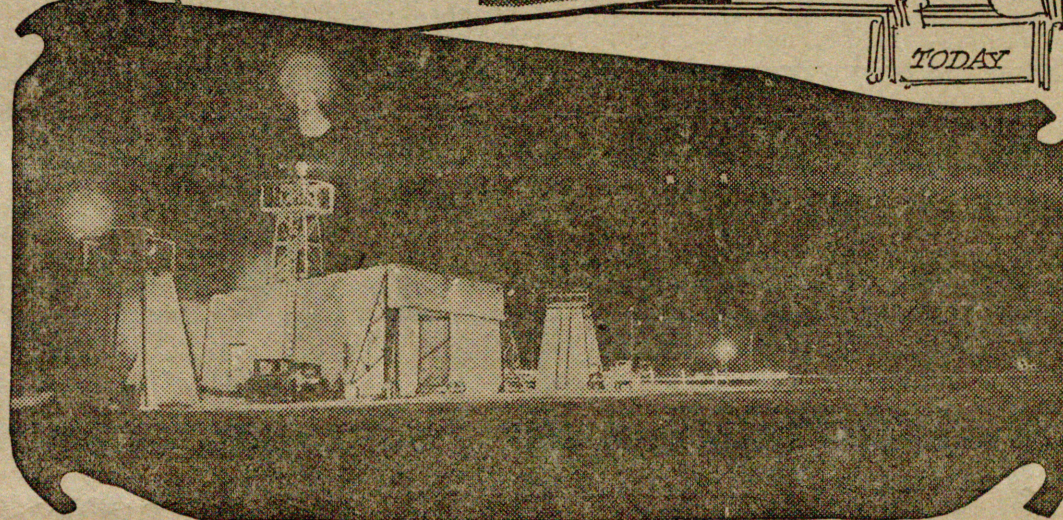

The day of the air mail is here and post office officials predict that the new air mail rates will so stimulate the use of air mail that in a few years practically all first-class mail will go through the air just as it turned to the train when that more modern method silenced the hoof beats of the pony express.

AN AIRPORT AT NIGHT

BARE TO HAIR

If you want to grow hair on your bald head, save the hair you have, stop falling hair, dandruff, etc., write for literature and information.

W. H. FORST, Mfg.

Scottsdale, Penna.

Hard Work

"Algy says he does an awful lot of brain work."
"I believe it. To make what little he has work must be awful."

Constipated Since Childhood; In Fine Shape Now

"I just couldn't resist any longer telling you of your wonderful medicine, Milks Emulsion. I have been constipated as long as I can remember. Had typhoid fever when I was eight years old and since then my bowels haven't moved freely. I have taken pills, salts, castor oil, and everything a person could think of.

"Now, whenever I hear anyone say they are constipated I immediately tell them of Milks Emulsion. I have taken about 12 large bottles, not all of them regular. Now I keep Milks Emulsion in the house and take it regular. I have taken so much medicine that I thought it was all alike.

"I had a sallow complexion, no color, and felt miserable all the time; but now I have the color of health, and health is something I wouldn't exchange with anyone for a fortune. I wouldn't take ten times the price I paid for Milks Emulsion for the results I have obtained.

"I am 19 years old and weigh 105 pounds. Have gained 5 pounds since taking your medicine and am still gaining. My face is round and my arms are getting round. Before, people used to hang their hats on my elbows, thinking they were hatracks. Now I am going to keep on with Milks Emulsion until I weigh 125 pounds.

"You may publish this letter if you wish and anyone that wants to ask me about your medicine may do so. I promise to answer every letter. In fact, I couldn't do enough for Milks Emulsion to repay them for what their medicine has done for me." ROSE-MOND BOWER, Frontenac, Kans.

Sold by all druggists under a guarantee to give satisfaction or money refunded. The Milks Emulsion Co., Terre Haute, Ind.—Adv.

Shouldn't

"How do the colors run in your new line of hosiery?" asked the lady customer.

"They don't," replied the loyal salesman.

HELPED DURING MIDDLE AGE

Woman Took Lydia E. Pinkham's Vegetable Compound

Denver, Colo.—"I have taken six bottles of Lydia E. Pinkham's Vegetable Compound and will take more. I am taking it as a tonic to help me through the Change of Life and I am telling many of my friends to take it as I found nothing before this to help me. I had so many bad feelings at night that I could not sleep and for two years I could not go down town because I was afraid of falling. My mother took the Vegetable Compound years ago with good results and now I am taking it during the Change of Life and recommend it."—Mrs. T. A. MILLER, 1611 Adams Street, Denver, Colorado.

Know Her?

"What sort of a dame is she?"
"Has a new set of friends every year."—Louisville Courier-Journal.

BAD LEGS

Do Your Legs Grow Tired Easily?
Do Your Feet and Ankles Swell and Inflammate and Get So Sore You Can Hardly Walk?
Have You Varicose or Swollen Veins and Bunches Near the Ankle or Knee?

To stop the misery, pain or soreness, help reduce the dangerous swollen veins and strengthen the legs, use Moone's Emerald Oil. This clean, powerful, penetrating yet safe antiseptic healing oil is obtainable at all first-class drug stores.

In hundreds of cases Moone's Emerald Oil has given blessed relief. Get a bottle today. Use it for Ulcers, Old Sores, Broken Veins and Troublesome Cases of Eczema. Your money back if it does not help.

MOONE'S EMERALD OIL

We make a great mistake when we think all men have a conscience.

FIGURES DISPEL A SMITH MYTH

Returns Indicate the Governor Makes Poor Showing in Rural New York.

HAS BEEN LOSING GROUND

Agricultural Districts Vote Against Him—Strength Diminishes Rapidly From 1922 Peak.

Election statistics mark the fact that the great political popularity of Governor Smith in his own State is a Democratic fiction.

He has gained public support as the State executive only in New York City, and he has invariably failed to gain it outside of that city. As candidate for Governor he would have been defeated, outside of New York City, at each of the four elections where that city gave him the office, and usually he would have been snowed under. He would have failed by net losses ranging from 93,000 to 410,000 votes.

Election statistics show that he has been a local leader only. He has never become a State leader because he has never gained the confidence of the State at large. Without the indispensable support of the Tammany organization in New York he would have remained a small factor in the politics of his State—a mere local politician.

The same statistics manifest that the last two of Smith's elections are far from proving that he has made any gain in the confidence of the State at large. On the contrary, these last two elections prove that he has lost a considerable share of the support he had previously received in the districts outside of Tammany control.

In 1922 he lost rural New York State, but he carried thirteen of the fifty-seven up-State Counties. In the presidential election year of 1924 he captured but one up-State county—Albany, the official home county of the party in power.

Two years later, in 1926, he recovered no more than three of the twelve up-State counties lost in 1924; and he lost the State, outside of his usual Tammany controlled local field in New York City, by upwards of three times as many votes as he lost in the one year (1922) when he sought to become a real State leader. That is, at his last election, two years ago, he lost up-State by 236,350 votes, as against his corresponding loss of only 93,278 votes in 1922.

The indisputable figures of the election returns thus record that, despite Smith's national ambitions, he has, during his last two terms as Governor, retired a long distance backward from his desired, but unattained, post as a true State leader, to his old, original rank as a successful city politician.

Coolidge Security

I consider it my duty to carry forward the principles of the Republican party and the great objectives of President Coolidge's policies—all of which have brought our country such a high degree of happiness, progress and security.—Herbert Hoover.

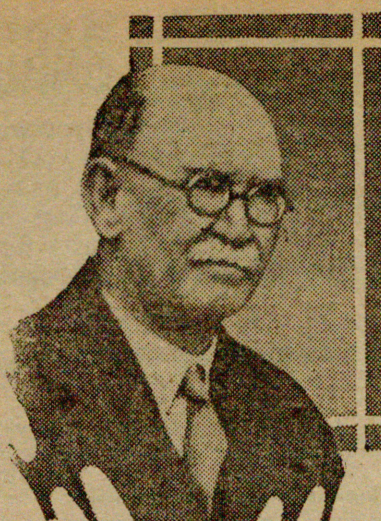

Ten Thousand Commandments

The basic principles laid down in the Ten Commandments and the Sermon on the Mount are as applicable today as when they were declared, but they require a host of subsidiary clauses. The ten ways to evil in the time of Moses have increased to ten thousand now.—Herbert Hoover.

IT will pay

our prices be-
fore you order

SALE
BILLS

Love Aids Hoover

Withdrawing from the Democratic race for lieutenant governor of Texas in order to swing his support to Hoover, Thomas B. Love, of Dallas, wired the Republican candidate that only blunders can prevent him from carrying the Lone Star State.

Thompson Promises Tax Re-adjustment

Champaign, Ill., (A. P.)—Floyd Thompson, Democratic candidate for governor, promised a large audience here that if elected he would work for readjustment of the tax system to shift the burden from the farmers and merchants with tangible property. He said that two-thirds of the men of the state commerce commission are country newspaper editors and charged that they are on the commission for the "sole purpose of seeing that the gang in control of the state house remains in control."

"If I am elected governor of Illinois I pledge you that I will cut off the heads of at least half of the men on the commission. It is too large. I will give you a fair and impartial commission drafted from the most able men in the state."

Mr. Thompson declared for a scientific civil service for all state appointments and pledged himself to widen state roads between the larger cities and to have no secret payroll and to prosecute the indictment against Fred Sterling.

ORLAND PARK

The Ladies Guild of the Orland Park M. E. church will hold their annual bazaar, Thursday afternoon and evening, October 4th. The sale will start at 3 p. m. and the supper will be served from 4:30 to 8 p. m.

The bazaar this year will be even better than that of any previous years. The ladies have been working all year in preparation. There will be a fine display of fancy work and hand woven rugs. The Country store will be a real attraction along with the bakery goods. The grab bag will be an attraction to the children and big boys and girls. There will be many other things to add to the fellowship of the evening. All are invited.

SCHOOL NOTES

Prof. Holt is getting the school well under way and the children all seem to be enjoying their work this year. There are a number of children of high school age who should be in school, but have failed to register as yet. It is a real opportunity for the children and all should take advantage of it. Many parents fail to do their duty by their children when they allow them to stay out of school.

WELFARE CLINIC

The infant welfare clinic is developing into a real success. At the last meeting there were 18 babies present. This is a real achievement for Orland Park and the fine thing about it is backing it strong. Not many communities of its size in the United States can boast of such a thing. The cities have long had this advantage but as in many things the small towns and country districts have had to be neglected.

The work of the clinic is to prevent disease in the children and to allow them to develop into healthy normal children. Often times a little bit of expert advice saves years of suffering in later life. The doctor handling the clinic is an expert on baby troubles and the nurse, Miss O'Connor is doing great work in helping to make it a success. The community is very fortunate in having Miss O'Connor as county nurse. She has had very fine training in one of the best hospitals and understands her work very well. She is willing to help anyone in the community in need of medical attention.

Every mother in the vicinity of Orland is welcome to bring her baby or small child under six years old to the clinic. The clinic is backed by the Parent-Teachers Association, Board of Directors of the Orland Park public school and the Lions Club as well as the citizens of the community. It is a real community asset so help boost it along.

Orland Park

School Notes

Enrollment in the Orland Park school has increased since school opened last week. It now stands as follows: High school 26; grammar 32; intermediate 35; primary 29.

New supplies are coming in almost every day. One new teachers desk and a number of pupils desks have arrived ready to be assembled.

We are all pleased to have an extra teacher this year which gives us all more room to expand.

Several new courses are being added to the high school curriculum. Physical Education for boys. Physical Education for girls. Separate pictures will be used. Music for boys and girls. The music will be in the form of community singing, chorus work, appreciation and training in fundamental principles of music theory. BELL SYSTEM AND INTERMISSION.

8:30 Warning bell. High school pupils only may come in to study. 8:55 Last bell. 10:45 grade bell at recess. 11:55 noon. 12:45 High school pupils may come in to study. 1:00 bell to assemble. 2:30 grade bell at recess. 3:30 dismissal for grades. 4:00 dismissal for high school.

Lucy Stone League

Lucy Stone was a suffragist who achieved considerable notoriety by declining to change her name upon marriage to the one borne by her husband, in accordance with common custom. A league was founded of women who preferred to retain their maiden names and was named in her honor "the Lucy Stone League."

Clean Electric Bulbs

The dry dust and dirt that accumulates on electric lamp bulbs and inside electric lighting fixtures often causes a decrease of illuminating value of 30 per cent within three months and where soot and oily dust are found the results are even worse. Therefore, all electric lamp bulbs and fixtures should be cleaned thoroughly and regularly.

PICTORIAL LIFE OF HERBERT HOOVER

No. 10

By Satterfield

1. After their romantic years in China the Hoovers settled down in America with their two boys.

2. During this period, Hoover made extensive contributions to the scientific literature of engineering.

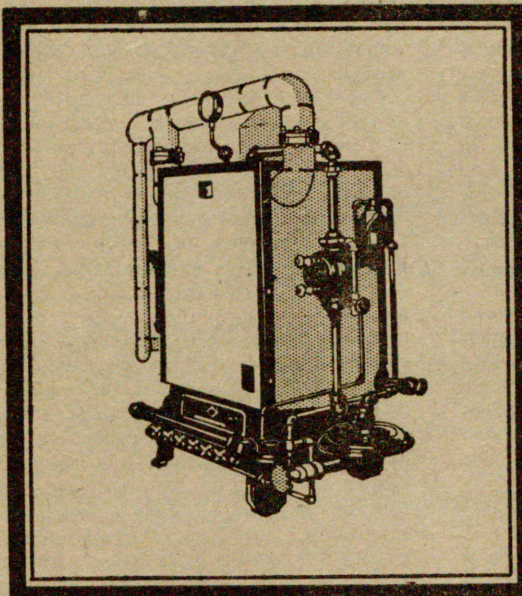

3. His leisure time was spent in scientific experiment in his own private laboratory.

4. Camp life was his vacation hobby. He is the only man who can poach an egg on the end of a stick.

THIS Company is now prepared to recommend and guarantee two types of equipment for heating your home with gas—The Bryant Gas-Fired Boiler for new homes or installations requiring a new boiler, and the Econ-O-Gas conversion type burner which adapts your present boiler to gas.

Practically all domestic heating requirements are satisfactorily covered in the wide range of sizes and adjustments of these two types of heating equipment.

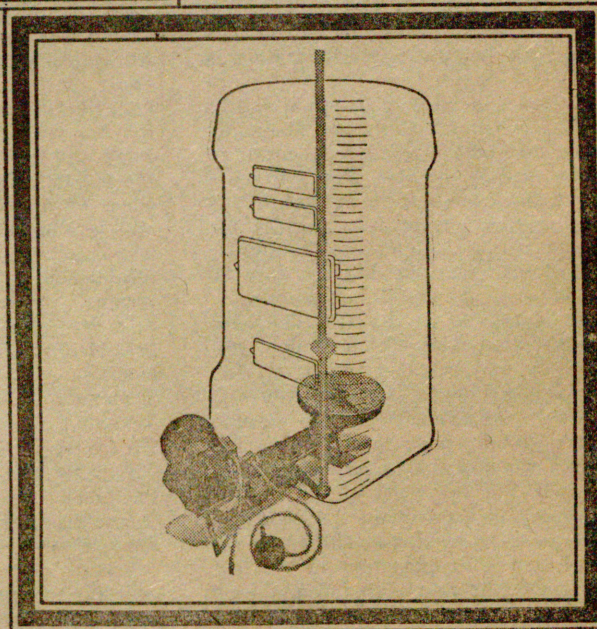

When you need
a New Boiler
We Recommend
the Bryant
Boiler with Gas
Burner Built In

WHATEVER the size of your home or the condition of your heating plant, Public Service Company heating engineers will gladly study your requirements and recommend the type of gas heating installation best suited to your needs. They will also give you, without any obligation, an estimate of the yearly cost of heating your home with gas.

Call your Public
Service Store

Otherwise we recommend
for use with your present boiler, the new Econ-O-Gas conversion type burner.

PUBLIC SERVICE COMPANY

C. Stephens, District Manager

ORLAND PARK

While Wm. Rick, local manager of the Beatty Lumber Company was driving toward Tinley Park Saturday evening, a car running north on Route 51 failed to stop at the 143rd street intersection and ran in front of Mr. Rick's car. He could not stop in time to avoid a collision. A woman and two children are reported to have been injured.

Oelke Bros., have taken over the former Powell garage.

Mr. and Mrs. J. F. Schmadeke attended the Rialto theatre at Joliet Sunday evening and saw "The River Pilot".

The Ladies Aid of the Christ Lutheran church will hold their monthly meeting next Thursday afternoon.

Last Thursday a shower was held at the home of Mr. and Mrs. Ted Rust in honor of Miss Olive Young of Alpine who is to be the bride of Joseph Rust, the wedding to take place Saturday. A week ago a shower was held at the home of the bride to be at Alpine.

Rev. W. C. Greve, former pastor of the Christ Lutheran church, now of Hegewisch, has purchased a new Chrysler car from C. A. Steinhagen of Tinley Park. Rev. Mr. Greve called on friends here the past week.

Last Friday a number of pastors and their families of the Lutheran churches of the nearby towns held a reception at the Christ Lutheran church parsonage in honor of the new pastor, Rev. W. H. Meddler and family.

Miss Emily Waje is contemplating opening a beauty shop in the Zerb's building in the rooms formerly occupied by a dental parlor.

Mr. and Mrs. Ole Anderson spent Sunday in Chicago to be present at the christening of John Roland, the infant son of Mr. and Mrs. Cyril Anderson which took place at the church of the Resurrection on Jackson Boulevard. The baby was christened in his father's baptismal dress and the sponsors were: Mrs. Ole Anderson the grand mother and Cyril Hubert, Chicago, great grand uncle of the baby.

After the christening Mr. and Mrs. Cyril Anderson served a chicken dinner to a large number of friends and relatives who were invited to celebrate the occasion.

In last week's issue it was forgotten to be mentioned Mrs. Holt presented the P. T. A., with a check for \$25 to be used for play ground equipment.

Mrs. J. F. Schmadeke and son Marvin spent Saturday shopping in Chicago.

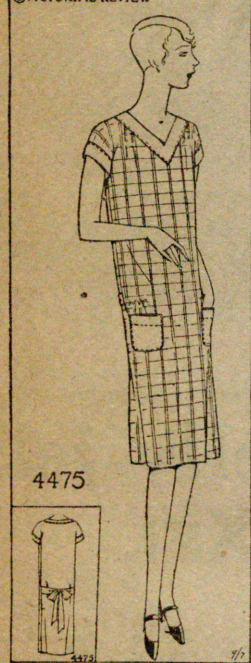

Henry Laasch underwent a tonsil operation at the Silver Cross hospital, Joliet this week. He is doing nicely.

Mrs. Bertha Nicolai is again at the St. Francis Hospital at Blue Island. After undergoing the second serious operation she is doing as well as can be expected.

PICTORIAL REVIEW

SIMPLY MADE HOUSE FROCK

This trim little house dress which is especially designed for women of larger hip is very convenient to slip on for housework or for morning marketing, and it is attractive and easily made besides. Long lines contribute slenderness to this one-piece model, while applied bands trim the V-neck and short kimono sleeves. Front and back are cut in from underarm edges and the lower edges gathered. Tie-strings, included in underarm seams, tie at the back. Checked gingham, printed challis, or washable printed pique is good.

Pictorial Printed Pattern No. 4475. Sizes 35 to 51 bust, 40 cents. Tomorrow's paper will illustrate a smart little school frock for the girl and Junior.

Did It Ever Occur to You

That price is not the first thing to be considered in a job of printing! Throwing type together in a haphazard way does not require any knowledge of the printing art. That isn't the kind of work you want. But artistic typography in stationery and advertising reflects credit to any concern. Our knowledge of printing gained by long experience enables us to produce

MOKENA

St. John's Evangelical Church

Rev. W. J. Cramer, Pastor

Sunday School 9:00 A. M.

Rally Day service, 10:30

A special program will be given by the Sunday school. All are kindly invited to attend our Rally Day service.

Brotherhood Rally at Frankfort. There will be a meeting in the afternoon at 2 o'clock. Supper will be served in the basement of the church. The evening service will start at 7:30. All members of the Brotherhood are asked to attend.

October the 2nd, Tuesday, all cradle roll babies and their mothers will meet in the church parlors for a grand and a glorious time. Voice testing contest and a number of other contests as well as games for the mothers are some of the social features and entertainments for the afternoon. The climax of the program will be eats for the kiddies.

Don't stay home, mothers, if you do, you deprive your little one of a mighty fine time and an All-Day-Sucker.

Our Mission Festival will be celebrated on Sunday, October 7th. Services will be held in the morning and evening. We are privileged to have with us the Rev. Edward Horstmann, a Missionary of the golden west, who will speak to us in the morning. Come and hear him. In the evening service, the Rev. S. G. Gerhold of Frankfort will address you and the Rev. E. Horstmann will give us a stereopticon lecture. Come and hear and see the wonderful work of our mission in the west. A glad hand awaits you at the door.

Mrs. Wm. Semmler, and Mrs. J. V. Hall attended the Housewives school and Food carnival now on at the Coliseum, Chicago, Wednesday.

Plans for the annual Food show Household appliance Exposition have culminated toward a miniature World's Fair, of particular interest to women whose chief concern is the welfare of their families and the beautification of domestic surroundings.

Discussion of the modern woman's household problems occupies the morning hours along with a Cooking school in which numbers of Chicago's best known hotel Chefs participate.

Prudence Penny, Home Economics expert, has a radio hour on K. Y. W. each morning from 11 to 12. Prominent clubwomen of the city have joined her as hostesses.

Stage and screen stars are present in person, and music and entertainment, form a background for the more educational features.

The ground floor has been transformed into a gala trade mart, vying with the bazaars of the Orient in its sumptuousness of exhibits. Space this year has been extended and the aisles laid out in streets named for thoroughfares of the central loop. A color scheme of green and ivory is being used.

A prize grocery is designed to occupy the entire rear of the coliseum, up-to-date in all details of modern appointment. A grocery stock valued at \$1,000 is on the shelves, and will be given away in a block on the last night of the show.

As in previous years free samples will be a feature of all food booths. Sandwich shops will be opened to care for families who spend the day at the exposition.

Representatives from the Manufacturers of labor saving devices for the home will be present each day for demonstration and conference. W. H. Murphy is managing director; and Miss Catherine Smith, secretary, with executive offices at 326 W. Madison St. The Food show continues to September 29th.

Mrs. Ethel Fisher who underwent an appendicitis operation at the Silver Cross hospital the past week, is improving nicely.

The Mokena Men's Club held the last dance of the season at their pavilion last Saturday night.

The Mokena School baseball team played the Beecher school team on the Schiek diamond last Friday afternoon and defeated them with a score of 16 to 5. The game was quite well attended.

MOKENA M. E. CHURCH NOTES

Glen T. Beatty, Pastor

Church School 10:30 A. M.

You will enjoy our evening worship service. Next Sunday evening, the pastor will discuss the question "Does Mokena Need a Preacher?" Invite your friends.

Word comes of the death by accident of our District Superintendent, Dr. E. C. Lumsden. Our people will greatly miss the fine spirit of this good man who came occasionally to bring us a great sermon message. The funeral was held Thursday afternoon at 1:30 o'clock at Dixon, Illinois in which city he made his headquarters.

Our annual conference will be held next week at the Morgan Park M. E. church beginning Tuesday evening. All persons are invited.

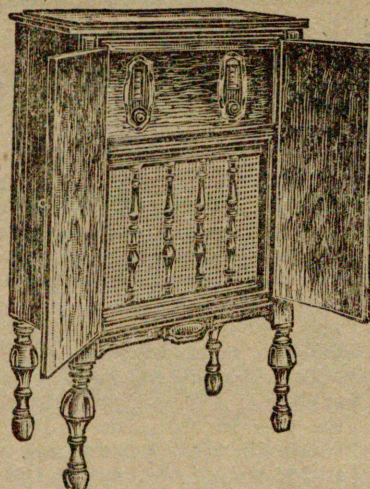

Orland P. T. A.

Show Much Activity

The first Fall meeting of the Orland Park Parent-Teachers Association was held in the Orland Park School auditorium on Thursday evening, September 13, and if the attendance and general interest manifested by all present is any indication, a most successful and prosperous year is to be looked forward to. Fifty-eight out of the sixty-four members were present and possibly a hundred more friends of the association were assembled when President Adele Cooper called the meeting to order.

The reports of the committees were read and approved. The treasurers report showed the association

R. C. A. Radiola Number 51

CLARENCE E. BEAGLEY

Tel. Store 97. Residence 29-J-2 ORLAND PARK, ILL.

to be on a sound financial footing.

President Cooper announced that to stimulate attendance at the meetings, the P. T. A. would donate a picture to be hung on the walls in the school rooms. The room which shows the largest attendance of parents at the regular monthly meeting will have the custody of the picture for the following month. Mrs. Lillian Knox was appointed a committee of one to select and purchase the picture.

The entire faculty of the school were present and after an address of welcome by President Cooper, the new Principal, Prof. E. F. Holt was introduced. Prof. Holt outlined his policy for the coming school year and after a plea for co-operation between the parents and the faculty, he introduced the remainder of his staff, Miss Evelyn Smith, High School Department, Mrs. Lulu Campbell, Grammar department, Miss Lucille Schmadeke, Intermediate department and Miss Helen Snyder, Primary department. Each one in turn gave a short talk on their aims and ideals and were enthusiastically received and welcomed by the members of the club.

Judge Sherman S. Knox, secretary of the School Board was called upon to say a few words in behalf of the Board and responded with a short outline of the work done by the Board during the vacation season and of plans for the future. To stimulate interest in the High school department and incite the pupils to put forth their best efforts, Judge Knox announced that he would personally present a medal or suitable token as a reward of honor to the pupil who graduates from the High School with the highest standings. This will be an annual award and it was stipulated by the donor that the School Principal, the assistant Principal and the President of the School Board should constitute the committee who were to select the honor student.

It is confidently hoped that this will lead to keen competition among the students with increased interest in their work and result in better grades. It was also suggested that some such award might also be offered by another member of the P. T. A. for the 8th grade honor graduate.

The P. T. A. is actively interested in the beautifying of the school grounds and a committee consisting of Ike Cleveland, S. O. Jennings, James Creer, John Schmadeke, Conrad Uthe and Wm. Stelter were appointed to work out plans for this feature. Through the courtesy of Ike Cleveland and Wm. Beagley sufficient crushed stone has already been donated to complete a wide walk from the street to the school building. More is needed to complete the drives and it is expected that this will be forthcoming. Conrad Uthe has donated his services to cut down the weeds and mow the lawn.

The playground and athletic field will be a reality in the very near future. Mrs. Ray Holton contributed a check for \$25 and James Creer one for \$10 to help purchase playground equipment. The club presented Prof. Holt with a check for \$15 to purchase a basketball, indoor baseball, volley ball and other items to begin activities with. A committee consisting of S. S. Knox, Geo. Cox, Louis Arnold, Earl Reich and Ray Holton was appointed to push the playground proposition and make it an assured fact.

Mrs. George Gee as chairman of Infant Welfare Clinic which is being sponsored by the P. T. A. under the direction of Nurse Irene O'Connor and Dr. Jezisele, submitted a report showing these clinics to be well attended and to be accomplishing much good.

Songs by the high school girls and by girls from the grammar department were well rendered and enthusiastically enjoyed.

Following the adjournment of the meeting, President Adele Cooper invited all assembled to partake of refreshments, coffee, sandwiches which had been donated by various members of the club.

The assembly repaired to the school yard and finished up a very enjoyable evening around a huge bonfire with an old fashioned marshmallow roast.

The next meeting of the Orland Park P. T. A. will be held Thursday

evening, October 11 and President Cooper has promised another worth while evening and everybody interested is urged to be present and become members.

FRANKFORT

Mrs. George Andrew and Mrs. John Clark attended the Republican Political Tea in the home of Mrs. R. Barr, Cherry Hill, Joliet.

Mr. and Mrs. Herbert Lambrecht entertained Wednesday evening in their home. The occasion being their fifteenth wedding anniversary. Pinochle was played and the evening spent informally. Refreshments were served late in the evening.

Mrs. John Clark spent a few days the past week in the home of her son Dr. Paul Clark and family in Marseilles, Illinois.

Mrs. Frank Cheney entertained the afternoon pinochle club in her home Friday. Pinochle was played at 3 tables and prizes were won by Mrs. Katie Fink, 1st, Mrs. Edward Fuss, 2nd. Refreshments were served. The next meeting will be at the home of Mrs. Minnie Fink, Oct. 5th at 1:45 p. m.

Mr. and Mrs. Charles Pfeifer and family attended the funeral of Mr. Edward Maue in Mokena.

Mr. Levi Doty had the misfortune to drop a piece of lumber on his foot and he was unable to be out for a few days but is improving nicely.

Robert Stephen our local postmaster was ill the past week quincy sore throat. It being necessary to have it lanced.

A large number of Frankfort people attended the Monee Fair the past week. Thursday being children's day the Public school was closed so the children could attend.

Mr. and Mrs. Max Haas are entertaining relatives from Iowa this week.

Miss Irma Schroeder underwent an operation at Silver Cross hospital Monday morning.

Mr. and Mrs. Charles Rahm spent a week at Elkhart, Indiana with their cousins, the Naumann family.

E. J. Phillips and daughter of Harvard, Illinois were the guests the past week of Mr. and Mrs. George Andrew.

The Brotherhood of the Monee District will meet at the St. Peter's Evangelical church next Sunday afternoon and evening for their annual convention. Supper will be served in the church parlors.

Mr. and Mrs. Chas. Pfeifer and daughters, Ella Marie and Burnetta spent Sunday at the home of Mr. and Mrs. George Pfeifer in Chicago Heights.

Mrs. Florence Weichbrodt of Green Garden underwent an operation Monday morning at the Silver Cross hospital, Joliet.

Mr. and Mrs. Lawrence Lorenzen and family and Miss Lucile LaHue motored to Marseilles, Illinois last Sunday for a visit at the home of Rev. Mr. Payne, former M. E. pastor here.

Miss Emma Weichbrodt, daughter of Mr. and Mrs. Herman Weichbrodt of Green Garden and Ezra Marti, son of Fred Marti, were united in marriage at 2:30 o'clock Wednesday afternoon in St. Peter's Evangelical church, Rev. G. S. Gerhold reading the service.

Miss Florence Weichbrodt and Arthur Weichbrodt were the attendants.

The bride wore a gown of white satin and carried a bouquet of roses. Her sister wore a peach georgette crepe dress.

Following the ceremony supper was served to the immediate relatives of the couple at the home of the bride. The couple have gone on an auto trip thru Wisconsin, Minnesota and Iowa and upon their return will reside in Frankfort.

Mr. and Mrs. Fred Krusemark of Ohio are visiting here with relatives. Mr. and Mrs. Krusemark will make their future home in Chicago.

Mr. and Mrs. Fred Krusemark and the former's mother, Mrs. Louis Krusemark visited in Chicago recently.

SHOE REPAIRING

Ladies and Gents sewed half soles. This is the main feature of our shoe repair service. Bring your next pair to H. Leonard's Shoe Repair Shop, Mokena, Illinois.

THE RETURN OF ANTHONY TRENT

CHAPTER XIII—Continued

By
WYNDHAM MARTYN

Copyright by Barse & Hopkins
WNU Service

Grant sat for a few moments in agony. He had been condemned to life imprisonment because this forgotten and submerged identity had masqueraded, through some strange cerebral vagary, as the real man. The news was too much to grasp.

"Didn't any friends stand by me?" Grant asked brokenly.

The doctor shook his head.

"A great deal of sympathy developed for Captain Sutton. I'm afraid your friends deserted you in the hour of need."

"Didn't my wife help?" He trembled with anxiety.

The doctor looked at him with a half-frown on his face.

"It seems incredible you've forgotten that. She has divorced you. No woman is expected to stick to a lifer."

Tears forced themselves through Grant's eyes. Even Natica, for whom he had sinned, had thrown him aside. After a pause the doctor went on talking.

"The exceptional sentence was due to your stubbornness. The judge wanted you to confess. Yes," he added reflectively; "I think if you had made a clean breast of it you'd have had a comparatively light sentence."

Payson Grant gripped the edge of his cot. New hope was born. There might be a way of reducing his term yet.

"Doctor," he cried excitedly: "Do you suppose if I were willing to make a full confession now it would help?"

The doctor considered the matter.

"It's not easy to say, off-hand."

"But your testimony would help."

"Mine," said the doctor: "What do you mean by my testimony?"

"You could say you found me wholly unconscious of the past. You could prove I was a different man at the trial and that I ought to have another chance."

"Hold your horses," the doctor said, frowning. "I couldn't testify to anything of the kind. All I could truthfully declare was that you pretended you didn't know who you were and tried to substantiate your truth, or lie, by making up your bed like one who had never done it before. Now, you are an educated man and you ought to be able to see my side of it. I ask you this. How long would I last here if I believed the tale of all the geniuses in Sing Sing?"

"My God!" Grant cried, "you can't think I'm lying?"

"Why not?" the doctor retorted. "Do you suppose it would be the first plausible lie I have listened to? I suppose we get the pick of the best criminal brains in the country in Sing Sing and they're most of 'em just as anxious to better their lot as you. I'm used to these stunts but I never lose interest in them; that's why I came to see what new one you were trying out."

Grant watched the doctor cross to the cell door. He felt that with him hope would step into the corridor not again to return.

"Doctor," he called anxiously, "just a moment. Do you know anything about the action of a drug they call bang in the East?"

The physician did not open the cell door. He turned and looked with renewed interest at the convict.

"I know all about it," he said. "I was a ship's surgeon before I came here and I've seen all I want to of hasheesh. Why?"

"I got in the habit of taking it. Do you think it might have robbed me of my mind?"

"Your mind?" said the doctor. He seemed to have a contempt for the lay form of expression.

"I simply don't remember anything that has happened. I never saw you before. I never saw that guard and yet he says he has been on this corridor for a month."

"That's very interesting," commented the other. "The drug's real name is Cannabis Indica, or Indian Hemp. It manifests itself in many very strange ways, perhaps, according to its degree of purity. Is this another of your facile excuses?"

"Won't anything make you believe?" Grant wailed.

"Not a thing," said the doctor brutally. "If you were sincere you would make a confession, properly witnessed, and not these sniveling excuses you are trying on me."

"That's just what I want to do," Grant cried, excitedly. "I'll tell you everything from the beginning."

"I haven't the time or inclination to listen. I have enough to keep me busy without that."

"Isn't there any justice or decency in the world?" the prisoner exclaimed. "Justice!" commented the physician, "you had a perfectly fair trial."

"But you won't understand that, it wasn't I who was tried. The man who was condemned had my body but that devilish green drug was talking—not me. If you don't listen to me you can't think of yourself as a fair-minded man."

He saw that the doctor was impressed by this.

"It's nothing to do with me," he said. "I'm a physician. It's up to the chief and the board of pardons. I'll tell you what I'll do. I'll go and see the chief right away. That lets me out." He hurried off.

The surly guard came and looked at Payson Grant. But this time he saw a more sanguine prisoner. Presently the secretary to the chief, who was also a notary, came in with a male

stenographer. The doctor came back with them. Grant looked upon him as a friend, and was glad.

He poured out his whole tortured soul to them. He concealed nothing; the relief he felt was amazing. Through all the devious ways by which he had set out to trap his benefactor they followed him. They learned why Sophy McKinnon had her farm given her; the name of the man who falsified the entries was set down; and that hired gangster who had, for a few pieces of silver, thrust a loaded revolver in Captain Sutton's pocket was written in.

When the typed statement was brought back—in an amazingly short space of time—Payson Grant signed it eagerly. It was not a confession that he felt he was signing. It was a document which might lessen his dreadful punishment. Of contrition there was no trace. He found himself already relying on the promised help of the physician.

"It's my firm belief," the doctor declared to the chief's secretary, "that this man does not remember a word that passed at his trial and I will testify to that belief before any jury of mental experts in the country. It will be a most interesting case."

As Grant looked at the signed instrument his eye fell on the date line. He saw that it was given as September 28.

"This is wrong," he said anxiously. "You'll have to correct the date." He was not going to have the statement invalidated by such an error. He

Grant Sat for a Few Moments in Agony.

knew he could not be in the wrong. Sutton himself had stamped the date vividly on his mind when he had declared that the seventeenth, as written in his threatening note, should have read the twenty-seventh.

The notary looked at it and smiled. "I guess that's near enough," he remarked.

"Like hell it is," Grant snapped. He appealed to the doctor.

"Don't worry about that," said the doctor. "There's more than that to come."

Amazing incidents crowded one upon another. The little cell seemed suddenly to have ceased to be occupied by dour, hard men whose work was disciplinary. The warder, for instance, had his arm on the shoulder of the doctor.

"Boy," said the warder, whose face as he smiled was altered as though another man was there. "I thought I was it, but yours is the name that goes in the electric."

Grant was still too intent upon getting the date changed to have time to speculate on the meaning of this. He saw himself being put in the wrong by a notarial error.

"Doctor," he urged, "this is incorrect." He felt his fate was in the official's hands. The doctor alone could aid him.

"You'll have to see the boss about this," said the doctor. "Don't worry; you've done your bit."

He whispered something to the warder, who left the cell. He was back

Ambergris in Demand for Use in Perfumes

When you tramp the margin of the sea, along the line where the waves leave seaweeds, bottle corks, and the unconsidered flotsam and jetsam which none sees fit to take away, make sure that the piece of stuff you took to be mottled soap is not a lump of ambergris. This precious substance, of which whalemen dream in their ambitious wanderings about the seven seas, comes from the alimentary canal of the sperm whale or cachalot.

A few years ago Norwegians fishing in Australian waters found in one whale ambergris weighing approximately 900 pounds. It was worth \$135,000. By contrast, the whole production of the United States in 1922 only amounted to 44 pounds, worth about \$11,500. And not so long ago a piece of good luck befell a

Spanish ship, the crew of which found 248 pounds in an Atlantic whale.

In centuries forgotten, when sperm whales were more abundant, ambergris did service in sacramental rites. The Chinese administer it medicinally. But most that is found today finds its way to perfumers, who use it as a fixative for delicate scents.

Around Orchard

KILL PEACH TREE BORERS IN FALL

Attention of peach growers is called to the advisability of fighting the peach-tree borer as the time for making the application of the paradi-chloro-benzene (paracide) draws near. In normal seasons this treatment should be applied between October 1 and 15, says F. H. Lathrop, chief of the entomology division at Clemson college, Clemson, South Carolina.

To make the application, level the surface of the soil about the base of the tree to the distance of about twelve inches. Remove all weeds, sticks, stones, etc., within this area, but avoid disturbing the soil more than necessary.

The amount of paracide used varies with the age of the trees: one-half ounce for three or four-year-old trees; three-quarters ounce for five-year-old trees, and one ounce for six-year-old trees. It is important to measure the amount of material accurately for an overdose may produce serious injury to the tree.

The paracide is placed in a continuous narrow band on the soil about the base of the tree, leaving a space of two inches between the material and the trunk of the tree. Carefully cover the paracide at once with a few shovels of pulverized earth. Pack this soil firmly about the base of the tree.

On trees three years of age or older this treatment should be left undisturbed for four to six weeks, and ordinarily needs no further attention.

It has been found experimentally that this treatment may be applied even to one-year-old trees without serious injury, providing proper precautions are observed. However, it is doubtful if it is economically advisable to apply this treatment to trees less than three years of age. Infestation is ordinarily not serious in young orchard trees and may be removed without difficulty.

This treatment is not fool proof, and injury is likely to result unless directions are closely followed in making the applications.

Strawberry Varieties on Market of Two Kinds

The strawberry varieties on the market are of two kinds, those that have both pistils and stamens, that is, perfect flowering varieties that need no other kind to cause them to set fruit. Such are Howard 17, Senator Dunlap, and many others. The others produce pistils only and require a perfect flowering variety planted near them in order to secure fruit. These imperfect flowering varieties are usually indicated in the nursery catalogues with "I," meaning imperfect flowering, or sometimes with a "P," meaning pistillate. The Sample is an imperfect or pistillate variety. There are no varieties on the market that are staminate or "male," as such a procedure would be entirely unnecessary. Even the pistillate or "female" varieties produce small abortive stamens but not enough pollen to effect pollination.

Deformed Apple Leaves Worry Many Orchardists

Some concern is being felt among many orchardists regarding a wrinkled and more or less deformed condition of many of the apple leaves. This manifests itself in a dwarfed and wrinkled condition, together with more or less blistering of the leaves. These blisters frequently crack open on the under side of the leaves, leaving a browned edge, which is sometimes mistaken for fungus or insect trouble. Practically all of this injury is due to early freezes. There are other causes of such wrinkled leaves, particularly due to certain types of spraying that occasionally occurs. Of course, nothing can be done to remedy the trouble, but as the season advances less and less of the frosted condition will be noticed.

Horticultural Notes

No two trees in an orchard are exactly alike in shape and amount of growth.

Some say spray, some say dust, but either is harder on bugs and fungus than neither.

Keep the cultivator going in the young strawberry bed. The next month determines the 1929 crop.

Dusting for the control of brown rot of peaches has proven satisfactory. The dust mixture can be prepared at home or bought ready-mixed.

Pinching tips of growing raspberry canes is a snare and a delusion, fine in theory but poor in practice.

On our rolling orchard lands temperatures vary from point to point. Therefore, each tree should be treated individually at pruning and fertilizing time.

Containers for fruit should meet the demand of the consumer and be suitable for the variety of fruit. Small containers are used more now than the larger types.

The new rule for making jelly use PEXEL

always this never this

PEXEL will surprise you with its speed and economy in making jelly. Does not change the color or flavor of your jams or jellies

USE any fruit you wish—the one that failed before. Add Pexel to the juice and bring to boil. Then add sugar. Bring to full boil again. Skim. It's finished. Pour into glasses. You've made the most delicious jelly in all your experience—and it will jell by the time it is cold.

In addition to making jelly jell, Pexel is economical and saves time. Cuts out the long boil. Makes more jelly because fruit juice, sugar and flavor don't go off into steam. Time and fuel are saved. Countless tests show that Pexel repays the 30c it costs from one to three times.

Pexel is different too! Made entirely from pure

fruit. Tasteless, colorless, odorless—absolutely. A powder—not a liquid. Keeps indefinitely. Equally effective with bottled fruit juices or unsweetened canned fruits.

Get Pexel from your grocer. Only 30c. The recipe booklet in every package gives easy-to-follow directions and accurate tables. The Pexel Company, Chicago, Ill.

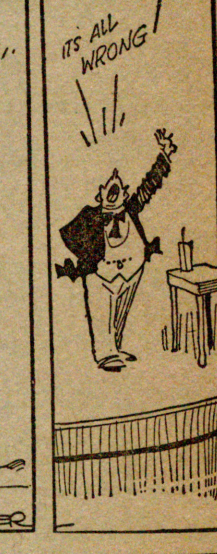

A few examples of how much jelly Pexel makes:

4½ cups strawberry juice, Pexel, 8 cups sugar make 11 glasses jelly.
4½ cups raspberry juice, Pexel, 8 cups sugar make 11 glasses jelly.
6 cups currant juice, Pexel, 10 cups sugar make 14 glasses of jelly.
4½ cups grape juice, Pexel, 7 cups sugar make 10 glasses of jelly.

Citizens Association Urges Defeat of Bond Issue

The Citizens' Association of Chicago urges the defeat of the legislative proposal to authorize a State bond issue of \$20,000,000 for the establishment of "a State-wide System of Fishing and Hunting Grounds", which is to be submitted to the voters at the election of November 6th.

In their opinion this bond issue project is unsound because it fails to designate the tracts to be purchased or to specify with sufficient definiteness the kind of land to be acquired by the State; and because the expenditure of the proceeds of the bonds is not adequately safeguarded. It is also objectionable for the reason that it embodies no practicable plan for paying the bonds and interest without direct taxation.

As the interest on these bonds will amount to about \$12,400,000, the bond issue actually involves a total expenditure for principal and interest of approximately \$32,400,000. Disinterested study of the matter leads to the conclusion that if the bond proposal is ratified by the voters most if not all of this great sum will have to be provided by direct taxes. This may mean an addition of more than one million dollars a year for 30 years to the load already carried by the taxpayers.

SUMMARY OF BOND PROPOSAL

The act authorizes the issuance and sale of 30-year bonds by the State to the amount of \$20,000,000 to pay the cost of acquiring lands for public fishing and hunting grounds, the rate of interest to be not more than 4 per cent. It specifies that the lands to be acquired shall be chosen for their suitability and accessibility and shall be "spread out over the entire State, roughly proportionate to population, so that all the people shall have approximately the same opportunity to partake of its benefits."

Expenditure of approximately \$20,000,000 to be derived from the sale of the bonds is entrusted solely to the Director of the State Department of Conservation, subject only to the approval of the Governor. That provision is as follows:

"The issuance, sale and retirement of the bonds and the acquisition and establishment of the State-wide system of fishing and hunting grounds, and everything incidental thereto, shall be under the general supervision and control of the Department of Conservation, subject to the approval of the Governor."

SECTION 11 of the bond issue act provides for the levying of a direct annual tax after the act becomes fully operative until all of the bonds have been retired, for such amount as shall be required to pay the interest and the principal as the bonds fall due. Then comes a vague provision that "the money in the game and fish fund" shall be used for meeting such obligations then due and that proper allowance shall be made therefore in fixing the annual tax-rate. As the receipts of the game and fish fund for the last three years have been entirely exhausted in paying the operating expenses of the Division of Game and Fish, Department of Conservation, it is quite clear that no money from that fund will be available for the payment of bonds or interest on the basis of present fees. Apparently this indefinite language was inserted to give an impression that the bonds and the interest might be met at least in part without direct taxation, under the plan presented.

TINLEY PARK

IN MEMORIAM

In loving memory of our dear mother, Mrs. Katherine Mohr, who passed away three years ago, September 25, 1925.

Just a sad and sweet remembrance, Just a memory fond and true, Just a token of affection And a heart ache still for you.

LOVING CHILDREN

Mr. and Mrs. Ben Bettenhausen returned Saturday from a 2400 mile auto trip in the west. Visiting with friends and relatives in Charles City Iowa, Truman Minn., and in North and South Dakota. They report a fine trip and a good time.

Mr. and Mrs. Fred Duerr returned to their home in Cleveland, Ohio, Monday after spending a week in the Ben Bettenhausen home.

Mr. and Mrs. Ben Bettenhausen and family attended the Monee Fair Thursday.

Mrs. Wallace B. Combs entertained at luncheon Monday. Her guests were members of the Englewood Woman's Club.

BACHELORS GR LUTH. CHURCH

Wm. Greve, Pastor
Next Sunday the annual Harvest Home Festival will be observed. Many products of the soil will be on display demonstrating how bountiful the crops of this territory were blessed by the Lord.

Beginning with next Sunday, services will begin at ten o'clock. The Y. P. S., meets next Thursday at 7:30 P. M. An electric blower and motor was installed in the organ recently, making a great improvement.

The Ladies Aid fixed the date of the annual Bazaar and Chicken Supper at the last meeting. This affair will again take place the Thursday before Thanksgiving, November 22.

The Misses Selma and Agnes Brueggemann sprung a kitchen shower on the new bride, Mrs. Geo. Slakowsky last Wednesday. For those who don't know it we will tell them. It was Miss Francis Keuch until a week ago Monday, when she went down town a Miss and returned a Mrs. We wish the newly weds much happiness. They will make their home with the bride's parents, Mr. and Mrs. Adam Keuch.

CARD OF THANKS

We wish to thank our friends and neighbors for the use of cars and floral offerings; also Rev. Buddenhagen for his kind words at the death of our beloved husband and father.

MRS. PHILIP BORMET AND CHILDREN

Rudolph Freberg has sold his property to Herman Meyer.

The annual bazaar and supper of the Ladies Aid of the Zion Lutheran church will be held at the Saenger hall the afternoon and evening of October 4th. Everybody invited.

Mr. and Mrs. Wallace Combs, Jr. have taken up their residence in Chicago. Mr. Combs will keep on in his garage business just the same.

Wm. Siekman who is very ill has been taken to the Harvey hospital. Mrs. John Boeyer and daughter, Miss Ericka have returned from a trip to Germany. They report a fine voyage and a wonderful time in Europe.

Mrs. Brandt was pleasantly surprised the forepart of the week when her son and a friend arrived here from California. They came by auto.

The infant of Mr. and Mrs. Chas. Neiman was christened Sunday by Rev. A. Buddenhagen. Name given is LaVerne.

The village board meets next Monday night in monthly session.

The new bunco club was entertained Wednesday by Mrs. Wm. Henke.

The Tinley Park bunco club met with Mrs. Fred Hick Thursday.

A harvest dance will be held at the Saenger hall Saturday night of this week. Music by the Southtown Vagabonds.

Rose Reier entertained a host of friends at her birthday party Sunday in Boeyers woods. A wienie and marshmallow roast was enjoyed.

Mrs. May Homan who has been keeping house for her father John Boeyer while her mother and sister were away on a trip to Germany, has returned with her twin children to Waverly, Iowa.

The Midlothian Post No. 691 of the American Legion will hold a dance and dedication of colors at the Community Hall in Tinley Park on Saturday, October 13

SUBSTITUTES REDUCE BELL PLATINUM BILL

Telephone Laboratories Find Means of Saving Millions In Cost of Service

Platinum, mined in the Ural mountains of Eastern Russia and the Transvaal of South Africa, is perhaps the most precious of the precious metals. Renowned for its staying qualities, it has been in increasing demand by jewelers, dentists, chemists, and electricians, and by 1924 its price had increased to six and a half times that of thirty-five years before. It was until recently the only metal known which would long withstand the disintegrating sparks at the tiny points where electrical contacts are made and broken. The advent of machine switching in telephony multiplied these points in the telephone system many fold; to establish a connection between two subscribers sometimes requires the opening and closing of nearly two thousand contacts. When telephone engineers foresaw that the far-flung intricacy of their communication system would involve millions of such contacts, Bell Telephone Laboratories searched for "platinum substitutes." Now palladium, and an alloy of platinum with gold and silver, are employed almost exclusively, and telephone users have been saved \$23,000,000 during eleven years by this means alone.

Facts About the Telephone

Telephone service has been opened between Great Britain and Gibraltar by way of Madrid.

A submarine telephone cable is to be laid across the Missouri river at Sioux City, Ia., this year.

The first radio telephone conversation from Atlanta to Hamburg, Germany, resulted in the sale of 400 bales of cotton.

A recent survey in the state of Missouri shows that every community having a population of more than 700 is provided with both telephones and electric lights.

The number of telephones is increasing in the city of Cleveland at a rate of approximately 7 per cent a year, while the population is increasing at 2 per cent annually.

There are in this country 9,000 telephone companies and, in addition, over 40,000 rural lines which connect with other systems but which do not bear the designation of telephone companies.

Telephone workers in the Bell System have given approximately 200,000 full eight-hour days of their own time, outside of business hours, to equip themselves by training at the hands of competent instructors for the rendition of first aid.

CLOSE BIG DEAL BY TELEPHONE

A big sugar deal, involving 300,000 tons of Cuban raw sugar valued at \$17,000,000, was consummated recently by transatlantic radio telephone service between New York and London. This is the largest deal in sugar ever made in one day and was made by the Czarnikow-Rionda Company of New York, through their London office, for the Cuban Export Corporation to British refiners.

NEW LENOX

The condition of Charles Parson who was seriously injured in a recent auto accident is improving.

Born to Mr. and Mrs. Wm. Penn in Chicago, a son Sept. 21. Mrs. Penn was formerly Marie Moore of New Lenox.

A Republican rally was held at the Grange hall Monday night. Sen. R. J. Barr spoke.

MARLEY

A "Good Tyme" social was held at the Marley church Friday evening under the auspices of the Marley Brotherhood.

The Woman's Missionary Society of the Marley church held their monthly meeting Thursday afternoon at the home of Mr. and Mrs. Edward Marshall.

Mr. and Mrs. Daniel Marti and daughter Alice of Kankakee were recent guests at the home of Mr. and Mrs. Bert Spiess.

Miss Josie Sharts visited at the home of Mr. and Mrs. James W. Owen on Lincoln Highway Monday.

Mr. and Mrs. Charles W. Lauffer and son Russel accompanied by the former's parents, Mr. and Mrs. Nicholas Lauffer motored to Mooseheart last Sunday.

Mr. and Mrs. C. F. Haley are spending several days at their farm near Earlville, Iowa.

Mr. and Mrs. Carl Bishop and family of Worth visited at the home of Mr. and Mrs. J. R. Sproat last Sunday.

PROPHECY HUGE EXPANSION FOR NEW YORK CITY

Telephone Engineers, Already Planning for 1945, Predict 3,000,000 Stations

A city of the future, far beyond its present commanding size and importance, is envisioned by officials of the New York Telephone Company, who must plan years ahead in order to provide New York City with adequate telephone facilities.

The way Greater New York grows is shown by the contrast between conditions in 1910 and those today. In the former year there were 360,000 telephones in service in New York. Within eight years that number had doubled and since then the yearly growth of telephones in New York City alone is as large as the entire telephone development of a city of 500,000 population. At the beginning of the present year New York had 1,600,000 telephones in service in the five boroughs, and the 1945 plans for the city on which the company is now at work call for a total of 3,000,000 telephones. This will mean that if these telephone figures are correct, New York City in that year will have as many telephones as there were in the entire United States in 1904.

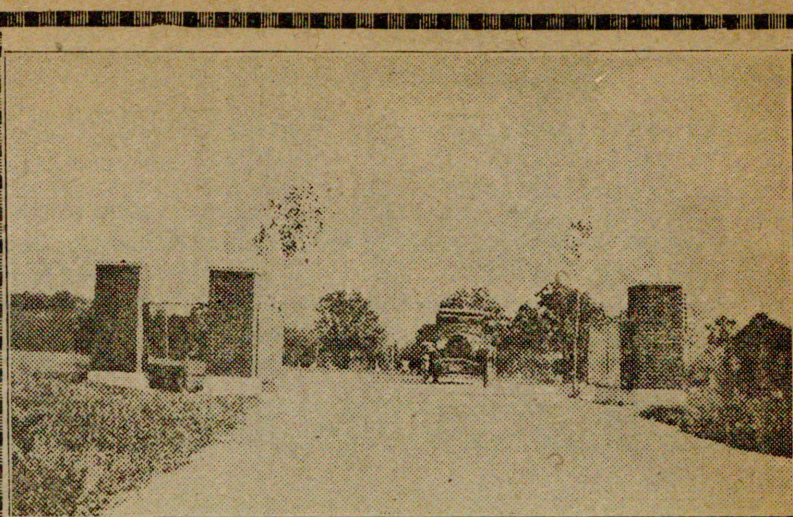

Since January 1, 1920, the New York Telephone Company has invested about \$70,000,000 a year to build up the city's telephone plant and to make the system capable of serving its thousands of subscribers. An immense amount of telephone plant has been necessary to meet the demand for increased service alone.

If the New York Company did not look twenty years ahead and plan accordingly, they would not be in a position to meet the demands for adequate service which the metropolis requires, and if, twenty years hence, the number of telephones will be almost double the present number in the greater city, it becomes difficult for the ordinary layman to contemplate the great amount of traffic that will be carried on over the wires at that time, for under present conditions, over 7,000,000 telephone calls originate in the city every business day. Of these, some 500,000 are Toll and Long Distance calls.

HELPS INDIANS KEEP PEACE FROM DISTANCE

Peace among the Indians on the spacious reservation near Tama, Ia., is kept by means of the long distance telephone. The Indians have been living peacefully on this reservation for many years, but once in a while there is trouble, just as there is apt to be in any community.

When such trouble arises, it is not necessary, as in the days of yore, for some nearby settler to mount a horse and gallop through the night from one log cabin to another in order to get help. Instead, the reservation is connected by telephone, and a telephone call to Cedar Rapids, fifty-five miles away, is generally sufficient to quell the disturbance. For at the other end of the wire is Michael L. Healy, United States deputy marshal. Mike Healy is the oldest United States deputy marshal in the country and he exercises greater influence over these Indians than any other person. Just a few words from him and the trouble on the reservation, as a rule, quickly comes to an end.
